Additional Comments: As this project develops I will follow it's progress based on the commitment that was made in writing on the environmental impact information that →

Was given to me. I support the money that will be brought in to our community and the surrounding communities. My one question however, is how many people from our communities will be employed? How many people will be brought from the outside area. The environment is very important it is everyone's responsibility to protect it for our generation and generations to come. On the other hand the human factor must not be overlooked. What kind of impact will this have on those who need employment who reside in our area and how will this support them?

I appreciate the fact that you are smaller and more aware of these issues. Will you deliver? Are you taking this survey and helping out with integrity or manipulation - my preference is honesty.

Thank You

I'm willing to be involved
