Fee access is a poor idea. No wonder every kid in America is sitting on their ass playing video games, quit nickel and diming us to death. With all these gas and oil leases plus cattle leases on our land do you not make any money from being a landlord full time?

I vote a strong no against this idea. I can't believe you're even asking. Our public lands are being destroyed from gas rigs, trucks, new roads, dust, etc. What does all that lease money go towards????????????
