I appreciate the opportunity to voice my opinion on the Upper Chattooga Environmental Assessment. The Upper Chattooga is a unique biological and cultural resource that will be changed forever by the human impacts associated with boating and would be best protected by no change in the current management. I support Alternative 1.
There are very few places left to get away from the mainstream of everyday life, and enjoy the beauty and tranquility of what God has blessed us with.

I feel that if access is allowed to this protected area, that it would allow some of the people that that are'nt willing to put forth some extra effort to indulge in our great outdoors,the ability to change the footprint forever. Not to say that everyone that utilized the easy access would do so,but the ones that are willing to go the extra mile,usually appreciate and respect such a place considerably more.
