First I would like to thank the FS on the time and effort placed on their studies involving the Chattooga River as whole.
I believe in protecting our natural resources, but feel that to continue to limit the use of the Upper Chattooga River is a disservice to all tax payers who wish to enjoy the river for their personal use. I believe Alternative 8 is the right plan to use on this area of the river. I raft, kayak, canoe, and trout fish and believe to allow one group use of the river and not another has been wrong and inappropriate for years.
Thanks,
Shay Woods
