I appreciate the opportunity to voice my opinion on the Upper Chattooga Environmental Assessment. The Upper Chattooga is a unique biological and cultural resource that will be changed forever by the human impacts associated with boating and would be best protected by no change in the current management. I am a Georgia native and have rafted on the Chatooga myself but I believe the boaters have enough space to use without opening the upper part of the river to them. This part should remain reserved for the present users to enjoy without the interference from the on water activites using variations of watercraft. I support Alternative 1.

Thank you!
