Contract Requirements

SECTION B

The intent of this solicitation is to obtain potable water trucks, gray water trucks, and trailer mounted handwashing stations as defined in this solicitation, for local, Regional, and Nationwide fire suppression and all-hazard incidents.

The Blanket Purchase Agreement resulting from this Request for Quote (RFQ) may be used by multiple State and Federal agencies.

Exhibit H contains requirements specific to the various State and Federal Agencies.

PRICING AND ESTIMATED QUANTITY

This solicitation will result in multiple agreements. The dollar limitation for any individual order is \$100,000.00. Since the needs of the Government and availability of Contractor's resources during an emergency cannot be determined in advance, it is mutually agreed that, upon request of the Government, the Contractor shall furnish the resources listed herein to the extent the Contractor is willing and able at the time of order. Due to the sporadic occurrence of Incident activity, the placement of any orders IS NOT GUARANTEED.

Proposed rates shall include, but are not limited to, labor, equipment, operating supplies, materials, State and Federal taxes (including workers' compensation costs), insurance coverage, transportation costs, overhead, and profit, and any costs/fees necessary to ensure equipment/ operators meet(s) the specified standards. Included in the daily rate is the cost for the contractor provided support truck for fuel, maintenance, and operator transportation as well as the Contractor's representative attendance at the operational period briefings. Contractors shall be prepared to operate up to 16 hours per day. The Finance Unit will work in tandem with Fire Operations to ensure contract resources are not worked more than 16 hours. Working more than 16 hours per day violates the 2:1 work/rest safety guidelines and shall be mitigated. When working an average of more than 16 hours, a Contractor may request to negotiate an equitable adjustment through the Procurement Unit Leader or Contracting Officer. Shifts exceeding 16 hours shall be approved by the Incident Commander.

Resources furnished under this agreement may be operated and subjected to extreme environmental and/or strenuous operating conditions which could include but is not limited to unimproved roads, steep, rocky, hilly terrain, dust, heat, and smoky conditions. As a result, by entering into this agreement, the contractor agrees that what is considered wear and tear under this agreement is in excess of what the resource is subjected to under normal operations and is reflected in the rates paid for the resource.

BASIS OF AWARD

The Government intends to award X number of Agreements, however, awards will only be made to those quoters offering a reasonable price and resources that are technically acceptable. Proposed pricing for ALL line items will be evaluated for

reasonableness. Reasonable price technically acceptable will be the basis for the best value determination. See Section E.2.

METHOD OF AWARD - CASCADING SET-ASIDE PROCEDURE: (User Note: CO's shall also review this acquisition for offering under the 8(a) program (Ref. FAR 19.800(e)) and document as part of the market research to determine set-aside. If offered to 8(a), modify the following provision and solicitation clauses accordingly.)

1. Multiple awards of Blanket Purchase Agreements (BPA) resulting from this solicitation will be made using the following cascading set-aside order of preference: (CO to tailor based on results of market research).

a. In accordance with FAR Subpart 19.13, awards will be made on a competitive basis first to responsible, eligible HUBZone small business concerns. (Refer to Section C, Clause C.1, 52.219-3, Notice of Total HUBZone Set-Aside. This clause is applicable only to this tier of the solicitation, not the solicitation in its entirety.)

b. If there are insufficient HUBZone small business concerns to meet the anticipated need, additional awards will be made in accordance with FAR Subpart 19.14, to responsible, eligible Service Disabled Veteran Owned Small Business (SDVOSB) concerns. (Refer to Section C, Clause C.1, 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside. This clause is applicable only to this tier of the solicitation, not the solicitation in its entirety.)

c. If there are insufficient HUBzone and SDVOSB concerns to meet the anticipated need, additional awards will be made in accordance with FAR Subpart 19.5, to responsible small business concerns.

2. Orders issued against awarded BPAs will be made using the following order of preference: (CO to tailor based on results of market research).

a. Any order issued under the awarded BPAs will be made first to a HUBZone small business concern. Priority ranking for dispatch among HUBZone concerns will be determined using the method described in D.6.2.

b. If there are no HUBZone small business concerns available, orders will be issued to a SDVOSB concern. Priority ranking for dispatch among SDVOSB concerns will be determined using the method described in D.6.2.

c. If there are no HUBZone or SDVOSB concerns available, orders will be issued to small business concerns. Priority ranking for dispatch among small business concerns will be determined using the method described in D.6.2.

Nationally, a Contractor may only receive one award for an individual piece of equipment. The Contractor may choose to respond to solicitations from multiple geographic areas; but upon acceptance of an offer of award, all other offers will be considered withdrawn. Prospective offerors are cautioned to carefully consider the solicitations to which they respond.

SUMMARY

THE CONTRACTOR SHALL:

1. Submit a quote in the Virtual Incident Procurement (VIPR) System (see E.1 52.212-1 Instructions to Offeror in Section E). A user guide is available at <http://www.fs.fed.us/business/incident/vipr.php>.

D.1 SCOPE OF AGREEMENT

The intent of this solicitation and any resultant Agreement is to obtain potable water trucks, gray water trucks, and trailer mounted handwashing stations for use on a local, regional and nationwide basis. The Contractor is responsible for all equipment, materials, supplies, transportation, lodging, trained/certified personnel, and supervision and management of those personnel, necessary to meet or exceed the Agreement specifications. The resources may be used in the protection of lands, to include but not be limited to fire suppression and all-hazard incidents. The Incident Commander or responsible Government Representative is authorized to administer the technical aspects of this agreement.

D.2 EQUIPMENT REQUIREMENTS

Equipment shall meet all standards established by specification or incorporated by reference and shall be maintained in good repair by the Contractor.

D.2.1 Contractor provided equipment:

D.2.1.1 Equipment Typing

Potable Water/Gray Water Truck

- Type I - 4000+ gallons
- Type II - 2500 - 3999 gallons
- Type III - 1000 - 2499 gallons
- Type IV - 400 - 999 gallons

D.2.1.2 Equipment Requirements.

D.2.1.2.1 Potable Water

(a) Potable water tanks shall be:

(1) Used exclusively for drinking water. Do not use containers for any non-food products. The potable water system, including filling hose and lines, pumps, tanks, and distributing pipes, shall be separate and distinct from other water systems. Do not use containers that have ever been previously used for gray water, toxic or bio-hazardous substances. (Reference: Code of Federal Regulations, Title 21, Section 129.40)

(2) Clearly and conspicuously labeled with the words "POTABLE" or "FOR DRINKING WATER USE ONLY" on both sides of the tank in lettering at least 4 inches in height. The capacity of the tank (in gallons) displayed on both sides of the tank or on both cab doors in lettering at least 4 inches in height. Name, city, and state of Contractor shall appear on both sides of the tank or on both truck cab doors in lettering at least 2 inches in height. A seal or sticker provided by the State or local authority shall be affixed to the upper left quarter of the rear of the tank or other location if specified by the issuing agency and shall be visible at all

times indicating that the tank has been inspected, certified and found to be in compliance with State requirements. If stickers are not provided by a State, a copy of the certificate or label shall be kept in the transport vehicle at all times. An annual inspection and certification of the tank by the local health authority is required. In addition, the carrier shall meet all laws and regulations for hauling on public roads. If the tank is part of the transport vehicle, then both the tank and vehicle shall meet State requirements, and the appropriate inspection and certification will be maintained for the vehicle.

(3) All trucks must comply with local certification process.

(4) Four Hundred (400) gallons capacity or greater and be made of non-toxic, non-corrodible/non absorbent materials or coated with non-toxic coatings National Safety Foundation (NSF) International Standard 61 that can be adequately cleaned and sanitized. Examples are stainless steel, food contact plastics (polyethylene), and food contact epoxy coatings. Surfaces that come in contact with water shall be smooth, without pits, dents, or crimps that may hold contaminating matter and welds shall be of non-corrosive material.

(b) TANK CONSTRUCTION. Tanks shall be constructed to the following requirements at a minimum and meet all State requirements for certification compliance if the State has these established:

(1) Openings: Hatches and other openings shall be completely covered and sealed with tight fitting coverings, permanently mounted food-grade gaskets, and security locks. Water inlets and outlets shall be equipped with threaded or clamped caps, tethered to the ports with chain or cable. Inlet and outlet caps shall be in place on all fittings except when water is being discharged or loaded.

(2) Tank vents: Vents will be designed to prevent water contamination. Tanks shall be vented by a downward facing, or otherwise protected vent opening of a sufficient size to allow air to replace water as it is discharged. This opening shall be protected by an appropriate screen as required in the state that certifies the equipment.

(3) If a State does not certify the equipment, the screen shall be made from non-toxic, non-absorbent material.

(4) Drain: Each potable water tank shall provide a means of drainage and, if it is equipped with a manhole, overflow, vent, or a device for measuring depth of water, provision shall be made to prevent entrance into the tank of any contaminating substance. No deck or sanitary drain or pipe carrying non-potable water or liquid shall be permitted to pass through the tank. A bottom drain shall be provided to facilitate complete discharge of water during sanitation procedures.

(c) TANK FILLING MECHANISMS

(1) There shall be no backflow or cross connection between potable water systems and any other systems. Pipes and fittings conveying potable water to any fixture, apparatus, or equipment shall be installed in such a way to prevent backflow. Waste pipes from any part of the potable water system, including treatment devices, discharging to a drain, shall be suitably protected against backflow. Either of the following methods may be used:

a. An approved backflow prevention device complying with Uniform Plumbing Codes 603.3.1, 2, 3, 4, 5 and 8 such as acceptable double check valves on the direct filling connection to the tank. No connections shall be located between the tank and the check valve.

b. Overhead filling through a hatch opening at the top of the tank; the filling spout must not be allowed to intrude into the tank further than two diameters of the filling pipe above the highest water level that is possible when the tank is filled. If an overhead filler pipe is mounted on the vehicle, when not being used for filling, this pipe shall be capped at each end with threaded or clamped caps, and tethered to the fittings at the ends of the filler pipe.

(2) Sanitary techniques must be observed in the water transfer operation. Care must be exercised to prevent foreign materials from entering the water. Since contamination could be present on the exterior surfaces of hoses or pipes, they must never be submerged in a receiving vessel. Adequate cleaning and sanitizing procedures shall be used on hauling vehicle(s) and associated

equipment at the following times:

- a. When the equipment is placed into service, or when it has been unused and stored in a sealed condition for a period of 4 weeks or more.
- b. When the filled or empty tank has been exposed by open or unsealed cover caps or fittings to any condition of possible contamination of the tank or contents, including contact with dust, smoke, rain, or chemical substances.
- c. When any fault or defect becomes apparent in the seals, vents, hatch doors, welds, valves, pipes, pumps, hoses or other equipment that may contaminate the water.
- d. When bacterial analysis of the water indicates presence of coliform bacteria.

(d) PUMPS

(1) Only water transfer pumps which can be readily disassembled to demonstrate the condition of the impeller and impeller chamber shall be used. Internal pump water contact surfaces, including seals, bearing, and lubricants must be constructed from food grade materials and must be smooth, non-porous, and corrosion resistant and use acceptable food grade lubricants. Manufacturer's data stating the pump is food grade (NSF 61) shall be made available to the Government upon request.

(e) HOSES

(1) Hoses shall have a smooth interior surface made of food-grade standard materials or materials meeting NSF International Standard 61. Pumps, hoses, fittings, valves and similar equipment shall be made of food-grade materials or materials meeting NSF International Standard 61 and shall be kept clean, disinfected and operated or handled in a manner that prevents contamination and capped or closed when not in use. Hoses shall be marked/labeled potable water and the use of galvanized pipes or fittings is prohibited.

(2) The ends of all hoses shall be provided with threaded or clamped caps. Such caps shall be in place when hoses are not in use. Hoses in storage compartments must also be capped.

(f) OPERATIONAL REQUIREMENTS AND BACTERIAL TESTING

(1) Hauled water is vulnerable to increased handling, diversity of source, variability in hauling equipment, and shall not be stored in the vehicle for a period greater than one week. All hauling equipment must be clean and in good condition. In addition, all water-contact surfaces in hauling and storage facilities shall be disinfected prior to use.

(2) All equipment surfaces intended for potable water contact, including source fill point equipment, containers, caps, tanks, hoses, valves, and fittings shall be inspected, washed, rinsed, sanitized, and replaced as often as necessary to effect and maintain sanitation of such surfaces. Procedures to be used are listed in Title 21, Code of Federal Regulations, Part 129.80. Disinfection needs to occur before being put in service, or when it has been unused and stored in a sealed condition after a period of 4 weeks or more, or after any food product has been hauled. Follow applicable State specifications/guidelines for disinfection of tanks either where the equipment was certified or to the standards where the equipment is going to be used if crossing state boundaries. When no applicable State specifications/guidelines for disinfection of tanks exist, at a minimum, the tank shall be thoroughly cleaned and disinfected. After 24 hours contact time with the disinfecting solution, the tank shall be drained and flushed with drinking water. Written procedures for equipment cleaning and sanitizing shall be maintained by the Contractor and shall be kept with the hauling vehicle at all times. These procedures shall include the names, amounts, and contact times of cleaning and sanitizing agents to be used. The frequency of equipment cleaning and sanitizing must be tracked in a log to be kept with the vehicle at all times. A copy of the Contractor's equipment cleaning and sanitizing procedures log shall be provided to the Contracting Officer or designated Government Representative upon request.

(3) At a minimum or when required by the local jurisdiction or State Law one microbiological test for total coliform shall be performed within 2 established business days of the time of arrival at the incident at a certified laboratory. Sampling by the contractor must be performed to industry standards and to the standards required by the designated laboratory. The sample to be

tested shall be obtained at the time of arrival at the incident. Where State-specific requirements have not been established, laboratory coliform test data must show that the water contains coliforms of less than 2.2 Most Probable Numbers (MPN)/100 ml (or "absence" if the presence/absence test is used). In addition, a test shall be performed on the first water load following any of the required sanitation procedures, whenever switching to a different water source and/or at least once every 30 days during months when water hauling is performed, and/or whenever such analysis is requested by state or local health authorities or Government representative. If the presence/absence (P&A) test for the coliform analysis is used, then only negative (absence) results are acceptable. If a sample tests positive (presence), the Contractor shall take out of service, investigate the cause of the problem; take corrective actions; resample/test the water; and notify the Incident Commander or designated Government Representative at the Incident. If the test data shows that the water contains more than 2.2 MPN/100 ml, the Contractor shall immediately take out of service; investigate the cause of the problem; take corrective actions; resample/test the water; and notify the Incident Commander or designated Government Representative at the Incident. The Contractor shall not haul water until the test shows that the water contains total coliform of less than 2.2 MPN/100 ml. Copies of the results of such tests shall be submitted to the Contracting Officer at the address indicated on the agreement or contract within seven calendar days after the end of the incident assignment. Test results shall clearly identify Contractor's name, address, and contract or agreement number on the report. Original laboratory test results shall be maintained by the Contractor and kept for at least 2 years pursuant to Title 21, Code of Federal Regulations, Part 129.80. Failure to comply with this requirement may result in the immediate cancellation or suspension of the Agreement. The Incident commander or designated Government Representative at the Incident with concurrence of the Contracting Officer will determine if/when the Contractor will be available for service.

(4) Tank shall arrive empty for inspection.

(5) Chlorine Residual: Contractors shall maintain a free chlorine residual level of 0.2 parts per million (ppm) up to 1.0 ppm at all times (1/3 cup of bleach that meets NSF standards to 1000 gallons water may achieve 1.0 ppm chlorine residual level). When residual levels drop below required levels the load shall be dumped and tank refilled.

(6) Contractors shall have chlorine residual test kits available at all times and test for free chlorine residual levels when:

- a. Loading drinking water for transport,
- b. After adding any disinfectant, if the addition of disinfectant is necessary;
- c. When unloading; and
- d. Every 24 hours the water is in use (provide with daily use documentation).

(7) Maintain records of activities on board the vehicle showing water source location, dates, and times of loading, unloading, chlorine residual test results, cleaning/sanitizing, and other operational items as deemed necessary. Copies of bacterial analysis test results and all agreements, contracts, licenses, etc. shall be maintained on board the vehicle at all times. Contractor will provide copies of these records to the Incident Commander or designated Government Representative.

(8) Failure of the contractor to perform the required testing at the times specified is grounds for immediate termination of an agreement.

(g) WATER SOURCES

(1) The host incident unit will designate the water source.

(2) Use only potable water from a permitted private or public (municipal or community system) drinking water supply. Filling must be accomplished using acceptable source water under pressure. Drafting of surface water is not allowed under any circumstances. The cost, if any, will be paid by the Government directly or by reimbursement to the potable water truck contractor. A copy of the billing statement from the owner of the water source to the contractor must be submitted to the Government if a contractor requests reimbursement.

(h) GOVERNMENT OR CONTRACTING AGENCY TESTING

(1) The Government or contracting agency may, at its option, perform random testing. The contractor shall provide reasonable access to all potable water tanks and apparatuses to the Government or contracting agency.

(i) ACCESSIBILITY

(1) Each truck shall be accessible to individuals for filling canteens or other water containers. It shall have a minimum of seven 3/4" faucets; one 1" faucet evenly spaced on a minimum 1-1/2" pipe, and located in easily accessible points on the truck. All materials used for plumbing the canteen filling stations must be constructed of food grade materials or acceptable metal (brass, aluminum, stainless steel, or copper). Must have effective backflow prevention (check valves), and dispensing spouts or hose bibs.

D.4 EQUIPMENT RELIABILITY

The Contractor shall provide dependable equipment that meets all applicable state and federal laws relating to motor vehicles and equipment.

The Government reserves the right to conduct inspections at any time.

D.5 AVAILABILITY

The Contractor is responsible for maintaining their current status by informing their host dispatch center of their availability, or if available, self-status in the Resource Ordering Status System (ROSS). When contract resources are unavailable, the resources will not be eligible for dispatch under the Agreement.

D.6 ORDERING PROTOCOL FOR RESOURCES

This Agreement does not preclude the Government from using any Agency or Agency Cooperator owned resources before resources are mobilized under this Agreement.

The Contractor shall restrict calls to the host dispatch center only. Dispatchers will not provide information, such as "when or if a Contractor will be called for an assignment" or "status of other contractors."

D.6.1 DISPATCH PRIORITY

Each host dispatch center will give dispatch priority to the resource offering the greatest advantage (See D.6.2) BEFORE all other private resources not under Agreement with the following exceptions:

- a. For initial attack, dispatchers will follow the "closest forces" concept and utilize locally available resources according to agency and incident needs. The priority dispatch ranking will not be used during initial attack and Contractor resources may or may not be used.
- b. Tribal preference policy established within reservation jurisdiction.
- c. Government normally will dispatch resources in accordance with this protocol; however, the number of fire orders in process and actual fire conditions at the time of dispatch may require a deviation from normal procedures in order to respond effectively to such conditions. Any such deviation will be within the discretion of Government, and will not be deemed a violation of any term or condition of this Agreement.

Upon receipt of a resource order by a host dispatch center, Government Dispatchers will not hold the Contractor resources in

reserve as a contingency force in a non pay status when that resource is available.

D.6.2 RANKING OF AWARDED EQUIPMENT FOR DISPATCH PRIORITY

All resources on an awarded Agreement will be ranked on a priority dispatch list by Host Dispatch Zone or Geographic Area . Priority will be given to those small business concerns identified in Section B, Method of Award Cascading Set-Aside Procedure. Within each small business program category, priority will be given for the type of resource as shown below. Separate priority lists will be generated for each type of equipment.

HANDWASHING STATIONS: The following calculation will be used to determine the lowest price for handwashing stations, with the lowest price being ranked highest on the dispatch list: $(\text{Daily Rate} + \text{Weekly Rate} + \text{Monthly Rate}/38)$.

POTABLE WATER/GRAY WATER: Criteria have been developed for the potable water truck and the gray water truck to assess the advantages for dispatch priority. Advantages will be given a point value. The total points for each piece of equipment's advantages are then divided by the price resulting in dispatch priority with highest total advantage per dollar being ranked highest on the dispatch list. The following is a list of the advantages and associated points for each equipment category. A complete breakdown can be found in Exhibit J.

ADVANTAGES

1. Potable Water Truck

- Gallons Hauled - Type 1 40 possible points
- Gallons Hauled - Type 2 60 possible points
- Gallons Hauled - Type 3 60 possible points
- Gallons Hauled - Type 4 20 possible points

2. Gray Water Truck

- Gallons Hauled - Type 1 40 possible points
- Gallons Hauled - Type 2 60 possible points
- Gallons Hauled - Type 3 60 possible points
- Gallons Hauled - Type 4 20 possible points
- Pump Type (Vacuum) 20 possible points

D.6.3 ORDERING PROCEDURES FOR RESOURCES

D.6.5 DISPATCHING PROCEDURES

D.6.5.1 When receiving a dispatch call, the Contractor shall confirm their availability and ability to meet specified timeframes. If the Contractor cannot be reached or is not able to meet the time and date needed, the dispatcher may proceed with contacting the next resource on the priority dispatch list. Contractor shall check in at the assignment at the time agreed upon when dispatched.

D.6.5.2 The Government will estimate the travel time to and from the incident. Travel time via ground transportation shall be calculated by dividing distance (from point of hire to incident, or incident to incident or incident to point of hire) by average travel speed of 45 mph, plus applicable rest time. Payment for travel will be made per D.21.7.

A pre-award inspection will not be done.

D.17 INCIDENT PRE-USE INSPECTION

All resources furnished under this agreement shall be in acceptable condition. The Government reserves the right to reject resources that are not in safe and operable condition. Prior to incident use or anytime the resource is under hire, the Government will perform inspections utilizing form OF-296 "Vehicle/Heavy Equipment Safety Inspection Checklist" to insure compliance with the Agreement requirements. The Contractor shall provide proof of insurance (cab card) and a current vehicle registration.

If the resource does not pass inspection at the incident or designated inspection station, it is considered noncompliant. The Contractor may be given 24 hours or time frame designated by Government representatives to bring the resource into compliance. Repeated notices of noncompliance may be grounds for cancellation of the Agreement.

D.19 WORKMANSHIP

All work under this Agreement shall be performed in a safe manner to a professional standard. The goal of performance under this Agreement is the suppression of wildland fire and other emergency incident responses. The Incident Commander may release from an incident assignment any Contractor employee deemed incompetent, careless, or otherwise objectionable including violation of Harassment Free Workplace Policy (Exhibit C). Unless otherwise specified in this solicitation, these samples shall be submitted at no expense to the Government, and returned at the sender's request and expense, unless they are destroyed during preaward testing.

(f) *Late submissions, modifications, revisions, and withdrawals of offers.*

- (1) Offerors are responsible for submitting offers, and any modifications, revisions, or withdrawals, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that offers or revisions are due.

- (2) (i) Any offer, modification, revision, or withdrawal of an offer received at the Government office designated in the solicitation after the exact time specified for receipt of offers is “late” and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and—
- (A) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of offers; or

(3) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the offer wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(4) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(5) Offers may be withdrawn by written notice received at any time before the exact time set for receipt of offers. Oral offers in response to oral solicitations may be withdrawn orally. (g) *Contract award (not applicable to Invitation for Bids)*. The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror’s initial offer should contain the offeror’s best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting

Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) *Multiple awards.* The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. E.2 FAR 52.212-2 Evaluation – Commercial Items (JAN 1999) (Tailored)

The Government expects to award multiple Agreements resulting from this solicitation to those Quoters whose quote is reasonably priced and technically acceptable.

- A. **Basis of Award.** The Government will award an Agreement to those quoters offering a reasonable price and resources that are technically acceptable. (See Section B, Method of Award – Cascade Set-Aside Procedure). Reasonable price, technically acceptable is the basis for the best value determination.
1. **Technical Acceptability.** Technical acceptability will be determined on a pass/fail basis. An offer will “pass” if the offered resource meets the minimum requirements stated in the specifications and has acceptable past performance.

Past performance is a measure of the degree to which the customer(s) has been satisfied in the past, and complied with Federal, state, and local laws and regulations and will be based on evaluations received for the quoter on incidents and other related experience within the past 36 months.

A neutral rating will be given to Quoters with no past performance data.
 2. **Reasonable Price.** The quoted price will be evaluated for reasonableness in accordance with the Federal Acquisition Regulations. Price is not the determining factor for award, but rather, a factor for consideration
- B. **Notice of Award.** An electronic offer of award and instructions to accept the offer of award will be electronically mailed to the quoter’s e-mail address as provided in VIPR. Quoters shall accept offer of award within 10 calendar days of receipt of offer. Failure to accept offer of award within specified time implies rejection of offer.

Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

HEALTH & WELFARE (Hawaii): \$1.37 per hour, or \$54.80 per week, or \$237.47 per month hour for all employees on whose behalf the contractor provides health care benefits pursuant to the Hawaii prepaid Health Care Act. For those employees who are not receiving health care benefits mandated by the Hawaii prepaid Health Care Act, the new health and welfare benefit rate will be \$3.24 per hour.

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at <http://www.dol.gov/esa/whd/> or through the Wage Determinations On-Line (WDOL) Web site at <http://wdol.gov/>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract.

{See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
