

Geospatial Assessment and Application of Burn Severity Data Training Webinar April 23-26, 2012

Training information & registration: <http://www.fs.fed.us/eng/rsac/baer/training.html>

Once registered, you will be notified via email in advance of the training to download course materials and provided with WebEx & Teleconference connection information

Agenda

All times listed are in Mountain Daylight Time

Although registrants may participate in any or all sessions listed below, we suggest attending on Monday morning, April 23rd, for a review of the three post-fire mapping programs and then attending subsequent sessions based on the specific training that is most applicable to your type of work.

Monday, April 23 (full day)

9am Welcome and introductions
Burn severity discussion and remote sensing overview

Break

10am Introduction to BAER, RAVG and MTBS programs; web site and data access demonstrations

Break for lunch around 11am

1pm Optional basic GIS / imagery exploration demonstration and exercise

Tuesday, April 24 (half day)

9am – 12pm BAER discussion and GIS exercises

Wednesday, April 25 (half day)

9am – 12pm RAVG discussion and GIS exercise

Thursday, April 26 (half day)

9am – 12pm MTBS discussion and GIS exercise

Suggested computer requirements:

- All GIS exercises are written for ArcGIS version 10. You will need the Spatial Analyst extension.
- Google Earth
