

What's New for 2006

- **New and Improved Field Pack, NFES 0678- The Blue Pack**
- **New Tall versions of the Fire Shelter NFES 0975 are available**
- **A larger waist size nomex BDU and several of the regular waist size's in longer 36 inch inseams coming soon.**
- **Larger shirt sizes coming soon.**
- **Spill containment bucket**
- **Fuel Tags**
- **Two types of disposable bath towels, a pocket size (NFES 0206) and larger size (NFES 0712).**
- **Note: As with all new items there will be an implementation and transition strategy due to the cost of adding new items and attrition of those items being replaced.**

The Rumor Mill

- Incident "Road" signing kits don't exist and are not stocked by the National Cache system.
- Type 3 Cache vans are not stocked.
- Q-turn (quarter turn) couplings for water handling equipment are still on hold, funding not available to implement.
- 2" suction hose study for MKIII pumps resulted in no performance enhancement.

Future

- **We are continuing working with SDTDC on a standard sprinkler kit.**
- **Interagency Cache Business System – Redesign**
 - **The Yantra Corporation (and Manugistics as prime contractor) are working with Cache SME's on the System redesign.**
 - **Will incorporate a supply interface between the cache system and ROSS.**
 - **Will incorporate bar code technology which will interface with (I-Suite) or other standard systems in use at the incident level to track and account for supplies and material.**
