going... going... **gone!**

GSA is pleased to present **GSAAuctions**

50 "live" auctions, on-line, with lots of items with specified refreshments. We make it easy! At bid closing, GSA will honor the highest bid received.

This new state-of-the-art technology streamlines the business process and allows greater flexibility and speed for the introduction of enhancements. It reduces your administrative costs, increases market penetration, and maximizes the return on your investments. Getting rid of your excess property won't get any easier than this.

GSAAuctions represents a major shift in the strategy for selling property that the Government no longer needs. In the past, surplus sales have been conducted at regional auctions utilizing traditional sales methods such as posted lists and on-site auctions. This new on-line system will allow GSA to offer assets located across the country to any interested buyer, regardless of location. In addition, we will be able to access a larger segment of the general public, which should result in more competitive sales prices and a greater return for the Government.

We will provide guidance for property disposal, special handling requirements, time thresholds for moving property, and advise you about property available for reuse.

For more information or to register, call (703) 305-7240 or visit <http://www.gsaauctions.gov/>

The primary use of the information is the awarding and administration of contracts for sales of Federal personal property. Additional disclosures of the information may be: for any legal proceeding to which GSA is a party; to Federal, State, local, or foreign law enforcement agencies in cases of possible violation or potential violation of civil or criminal law or regulation; to authorized officials engaged in investigating or settling a grievance, complaint, or appeal filed by an individual who is the subject of a record; to the Office of Personnel Management, the General Accounting Office, or the National Archives and Records Administration when the information is required for evaluation of the program or program records; to a Member of Congress or his or her staff on behalf of and at the request of the individual who is the subject of a record; to an expert, consultant, or contractor of GSA in the performance of a Federal duty to which the information is relevant; and to the GSA Office of Finance for debt collection purposes (see GSA/PPFM-7). MySales is a website that affords federal agencies the means to report, modify and maintain status of their surplus and exchange/sale property reported to GSA to sell.

MySales provides the Federal agencies the capability to report exchange/sale property to sell and to access surplus property reported via [GSA Xcess®](#) that was screened worldwide but did not get transferred or donated. By using MySales, agencies will also have the capability to check the sales status of items reported to GSA, modify item data including descriptions, withdraw items available for sale, respond to Sales notices and update user information. Previously, this process was handled manually.

These features will become available in stages. Checking the sales status of items reported to GSA and withdrawing items available for sale are currently available. The other features will be available at a later time.

In addition, MySales provides a Custodial User Maintenance screen that is available only to those authorized officials or designated persons appointed by agency. The user will be able to add or delete users, update user information and change your password and levels of access.

MySales is available to authorized users. See Frequently Asked Questions (FAQ) to learn how to become an authorized user and how to use MySales.
