

## **PRIEST LAKE PERMITTEES ASSOCIATION**

504 S Raymond Road  
Spokane, WA 99206

February 16, 2005

Dear Permittees,

Here are the new Standard & Guidelines for maintenance and improvements on our cabin sites.

A committee from the Priest Lake Permittees Association worked with the Forest Service to develop these rules and regulations, which are designed to keep Priest Lake the kind of place that drew us here.

Most of us came to Priest Lake because we love the lake and woods surrounding it. The lake continues to have almost unmatched clarity for so large a body of water. The woods around our cabins play a major part in protecting that quality, not to mention the air they clean, the beauty they provide and the wildlife they shelter.

The association's board of directors wholeheartedly supports these guidelines. We believe they will help us keep that feel of "a cabin in the woods" and prevent the west shore from becoming just another crowded recreation subdivision. As we all know, this place is special. If we all follow the guidelines and respect the woods and the beaches and the lake, they will be here for our children and grandchildren to love and enjoy.

Sincerely,

Ron Yandt, President
