

St. Joe Large Scale Ecosystem Restoration Project

Accomplishments with WFY104 funding in FY2002

Bear Bussell EAWs area: 15 miles of stream habitat typing
8 culvert surveys
10 streams electrofishing survey
6 streams snorkel survey
9 streams temperature monitoring

Stand exam and old growth surveys: 1,202 acres

Quartz Gold EAWs area: 3 culvert surveys
Botanical surveys: 2,000 acres

Upper St. Joe Bull trout Presence/Absence surveys: 10 streams

Habitat Restoration:
Turner Creek willow planting: 0.5 miles
Heller Creek willow planting: 0.5 miles
Heller Creek structures: 108

Eagle-Bird Prescribed Burning: 483 acres

Lynx surveys: 90-100 sq. miles

Bat surveys: 9 abandoned mine adits

Eagle-Bird vegetative treatment preparation: 1,615 acres

No new partnerships were developed for the above projects. The only partnership for any of these projects was associated with the Heller Creek structures and that was reported last year and for the wildlife burning which was also reported last year.
