

The
Department of Defense Market
for WOODEN PALLETS:
1967

By John T. Lucas
and Walter B. Wallin

U. S. D. A. FOREST SERVICE RESEARCH PAPER NE-131
1969

NORTHEASTERN FOREST EXPERIMENT STATION, UPPER DARBY, PA.
FOREST SERVICE, U. S. DEPARTMENT OF AGRICULTURE
RICHARD D. LANE, DIRECTOR

THE AUTHORS

JOHN T. LUCAS received his B.S. degree in forestry from West Virginia University in 1963 and his M.F. degree from Duke University in 1964. He joined the Northeastern Forest Experiment Station in 1964 and was associate economist in the Station's secondary manufactured wood products project at the Forest Products Marketing Laboratory, Princeton, W. Va. until August 1968. He is now a stockbroker with White, Weld and Company in Hagerstown, Md.

WALTER B. WALLIN received his Ph.D. in wood technology and economics in 1957 from the University of Minnesota where he was an instructor and professor at the School of Forestry from 1952 to 1960. He was research advisor to the government of East Pakistan under the auspices of the U.S. Agency for International Development from 1960 to 1965. He is now a project leader at the Forest Products Marketing Laboratory, Princeton, W. Va.

OUR STUDY of the Department of Defense market for wooden pallets in 1967 showed:

- Forty-seven percent fewer pallets were purchased in 1967 than in 1966.
- Plywood pallets were purchased for the first time.
- Nine new pallet specifications were on the DOD list of standard pallet specifications.
- Two temporary distribution areas were set up.

The purpose of our study was to update and supplement the information in "The Department of Defense market for wooden pallets: 1965".¹ Unless otherwise noted, all information relates to 1967 and 1968.

QUALITY AND QUANTITY REQUIREMENTS

The list of Department of Defense (DOD) standard pallet specifications includes 26 different pallet specifications. Each one is designated by a Federal Item Identification Number (FIIN). Nine of the pallet specifications were not on the list in the original report, and three that were listed in the original report in 1965 are no longer classified as standard.

Of the 26 FIIN's, softwood pallets are designated by 8; and

¹ Lucas, John T. and Walter B. Wallin. THE DEPARTMENT OF DEFENSE MARKET FOR WOODEN PALLETS 1965. U.S. Forest Serv. Res. Paper NE-117. 40 pp. NE. Forest Exp. Sta., Upper Darby, Pa. 1968

hardwood pallets are designated by 18. Eleven of the above FIIN's designate knocked-down pallets (table 1).²

DOD updated one pallet specification in 1968. Specification MIL-P-15943B is now designated as MIL-P-15943C.

DGSC purchased 47 percent fewer pallets in 1967 than in 1966. This decrease can be attributed to these factors:

- Hardwood pallets that have been used for the shipment of goods to Vietnam are being reused in Vietnam.
- Many DOD installations built up large inventories of pallets in 1966.
- Many goods that formerly were shipped on pallets are being shipped overseas in skidded plywood containers.
- DOD is purchasing more goods on pallets. Pallets purchased as part of such a unit load are not recorded by DGSC as pallet purchases.

In 1967, 25 of the 26 standard pallets, which are described by 7 different specifications (table 1), were purchased by DGSC (table 2). Six of the pallets (FIIN's 063-9075, 141-7261, 222-1044, 223-6529, 599-5326, and 926-1046) constituted two-thirds of the 1.6 million wooden pallets purchased by DGSC in 1967. Thirty-four percent of the wooden pallets bought by DGSC were softwood units, and 27 percent were knocked-down units (table 2).

DOD has decided that both a post pallet (FIIN 141-7261) and a notched-stringer pallet (FIIN 599-5326) will be designated as primary—the post pallet for overseas shipments and a choice of the post or notched-stringer pallet for domestic shipments. In 1967, 39 percent of the wooden pallets purchased by DGSC were post pallets; and 61 percent were stringer pallets, principally with notched-stringers (table 2). Both of the proposed primary pallets are wing pallets. Seventeen of the 26 FIIN's designate wing pallets, and 82 percent of all pallets purchased by DGSC in 1967 were wing pallets (table 2)

Plywood pallets were purchased by DGSC for the first time in 1967. They were non-standard pallets that conformed to a Civil Defense purchase description.

² All tables are in Appendix

PROCUREMENT AND CONTRACT PERFORMANCE

As of January 1968, 349 firms were listed on the DGSC wooden pallet mailing lists. In 1967, DGSC bought wooden pallets from 49 different firms (table 3). Five firms supplied 47.8 percent of the pallets, and the largest supplier accounted for 13.9 percent. About one-third of the firms that sold wooden pallets to DGSC were in California and North Carolina, nine and seven firms respectively.

Slightly more than three-fourths of all wooden pallets sold to DGSC in 1967 were produced in five states. North Carolina supplied 21.5 percent; Arkansas supplied 16.1 percent; Oregon supplied 15.0 percent; Texas supplied 13.3 percent; and California supplied 11.0 percent (table 3).

All the DGSC wooden pallet purchases in 1967 were from small business firms (500 or fewer employees). Twenty-nine percent of the purchases were from firms in labor surplus areas, and 61 percent were from firms in non-labor surplus areas.

Eighty-seven percent of the wooden pallets were purchased f.o.b. origin, and 13 percent were purchased f.o.b. destination (table 4). Although the terms f.o.b. origin and f.o.b. destination were officially replaced, respectively, by f.o.b. origin (Government Bills of Lading) and f.o.b. origin (freight prepaid to destination by contractor), the original terminology will be used so this report can more easily be compared with the 1965 and 1966 reports.

Because f.o.b. origin shipments predominated, the method of shipment for different kinds of pallets in 1967 differed considerably from that in 1965. F.o.b. origin shipments of pallets purchased by DGSC comprised 91.3 percent of the knocked-down pallets, 84.8 percent of the assembled pallets, 82.1 percent of the softwood pallets, and 88.9 percent of the hardwood pallets (table 4).

Average prices paid for wooden pallets bought f.o.b. origin in 1967 ranged from 51.3 percent lower to 40.1 percent higher than the prices paid in 1966 (table 5). Prices were lower in 1967

than in 1966 for 15 of the 17 kinds of pallets bought f.o.b. origin in both years. And price decreases from 1966 to 1967 were greater than 19 percent for all but five of the pallets.

The percentage range from the low to high f.o.b. origin price (based on the low price) paid for a specific pallet in 1967 varied from a low of 0 percent to a high of 109.6 percent (table 6). In 1966 the high was 171.8 percent. The low range was below 50 percent for 20 of the 23 pallets bought f.o.b. origin in 1967. Wooden pallet prices generally decreased throughout the year, but some items increased slightly in the fourth quarter (table 7).

Two temporary distribution areas were set up in 1967—Umatilla and Navajo (fig. 1). They were established mainly to lighten the work load of the original Tracy area.

Prices for most of the pallets supplied from the Richmond region were generally lower than prices for the same pallets supplied from other regions in 1967. Prices were generally higher for pallets supplied from the Memphis, Navajo, and Tracy regions (table 8 and fig. 1).

Figure 1. — DGSC distribution areas in the United States.

WHERE AND WHEN THE PALLETS ARE NEEDED

In 1967, DGSC received requisitions for 2,607,559 wooden pallets from DOD and purchased 1,611,156.

The Armed Forces needed 83.8 percent of the wooden pallets bought by DGSC in 1967. Most of the wooden pallets were needed by the Army (53.6 percent), followed by the Navy (27.3 percent), the Marine Corps (1.6 percent), and the Air Force (1.3 percent). Other sources of demand—the Coast Guard, General Services Administration, and the Military Assistance Program—needed 16.2 percent of the pallets (table 9).

More pallets were required in January (11.4 percent) than in any other month in 1967 (table 10). Monthly pallet demand was more constant in 1967 than in 1965 or 1966. December was the only month in which demand was considerably below the average monthly demand for the year.

More pallets (31.5 percent) were required by installations in the Richmond region than in any other region. Installations in the Tracy region required the next largest proportion of pallets (26.2 percent) (table 11). As in 1966, most of the knocked-down pallets were required by the Tracy and Richmond regions (82.8 percent). But the demand pattern for softwood pallets in 1967 was different from that in 1966. Only 41.4 percent of the softwood pallets were required by the Tracy and Richmond regions (table 11).

¹ The six kinds of pallets designated by an asterisk (*) beside the FIIN's constituted two-thirds of the number of standard pallets purchased by DGSC in 1967.

² The knocked-down category refers to parts for pallets that are packaged for shipment to a DOD installation, generally overseas, where fabrication takes place. All but two are shipped in bundles containing parts for 20 pallets. FIIN's 222-1053 and 926-3748 require parts bundled for one pallet only.

³ Some DOD specifications and purchase descriptions allow only certain species for pallet construction—in several instances, low-density broad-leaf species are classified as "softwoods".

THE FOREST SERVICE of the U. S. Department of Agriculture is dedicated to the principle of multiple use management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the States and private forest owners, and management of the National Forests and National Grasslands, it strives — as directed by Congress — to provide increasingly greater service to a growing Nation.
