

## APPENDIX B.

### ECOLOGICAL INTEGRITY AND SOCIOECONOMIC RESILIENCY RATINGS BY SUBBASIN AND COUNTY.

This Appendix presents the subbasin ecological integrity ratings for each of the component systems (forest, rangeland, aquatic, rangeland hydrology, and forest hydrology) as well as the composite integrity rating. Each of the 164 subbasins was rated for aquatic and composite ecological integrity. Ecological integrity ratings were developed for forest (range) systems if the subbasin had at least 20 percent of its area in forested (range) vegetation types. Subbasins were grouped into clusters based on similarities in ecological conditions and characteristics. Clusters were developed for forested systems and rangeland systems.

Figure B-1 shows the distribution of the subbasins within the Basin and figure B-2 shows the distribution of the counties within the Basin.

Table B-1 contains the integrity ratings for each subbasin, and they are also identified by name and number. See Sedell and others (*in preparation*) for details on how these ratings were determined. Briefly, integrity ratings reflect the relative level of ecological functions and processes that are present and operating within a subbasin, relative to the Basin. Thus, relative to the Basin as a whole, a subbasin with high ecological integrity would have more ecological functions and processes effective than a subbasin with a low rating. Proxies were used to estimate such elements of integrity as: consistency of tree stocking level with long-term disturbance processes; amount and distribution of exotic species; absence or presence of wildfire and its effect on composition and pattern of forest types; changes in fire severity and frequency from historical (pre-1800s) to the present; expansion of woodlands into herblands and shrublands; disruption of hydrologic regimes; and, the full expression of potential life histories. Composite integrity ratings reflect the ecological integrity of the subbasin based on its component integrity.

Table B-2 contains the assignment of counties (fig. B-2) by typology and resiliency ratings for each county. See Haynes and Horne (*in press*) for details of how these ratings were developed. Briefly, the economic resiliency ratings were developed where high, medium, and low resiliency meant that a county was in the top, middle, or bottom third of the counties nationally, based on employment diversity. Social resiliency was defined using population density and how a county ranked relative to the average for the Basin and the United States. Lifestyle diversity was defined by the top, middle, and bottom thirds of the counties in the Basin. Socioeconomic resiliency was defined as the linear summation of the ratings (where the ratings were converted to point scores) for economic and social resiliency, and lifestyle diversity. High, medium, and low ratings were assigned based on ranges of point scores.

Table B-3 contains the long-term trends in risks to ecological integrity for each subbasin by management option. See Quigley and others (1996) for details of how these ratings were developed. Briefly, long-term trends in ecological integrity were developed for each management option based on a set of indices reflecting forest and rangeland vegetation, riparian management, and management of road densities. Values assigned reflect either decreasing (-1), stable (0), or increasing (+1) trends for each index. Composite trends represent the summation of the three indices for each subbasin. Thus, composite trends ranged in value from -3 to +3. Trends in risks to ecological integrity were estimated using a rule set that related population density to forest, non-forest, and agricultural wildland vegetation groups. Generally, higher risk was associated with forested vegetation groups and areas of high population density.

## APPENDIX C.

### HABITAT OUTCOMES

### FOR SELECTED SPECIES WITHIN THE BASIN.

This appendix presents the definitions (fig. C-1) and outcomes of viability for individual species (table C-1) during historic, current, and projected future timeframes in the Interior Columbia Basin Ecosystem Management Project (ICBEMP) assessment area. Outcomes describe effects of habitat changes on federal lands only, and cumulative effects on populations from habitat changes on federal and non-federal lands and from other non-habitat influences.

Judgments on viability outcomes were solicited from expert panels provided with information on the species population and habitat relationships, and information on habitat conditions for the timeframes (see Lehmkuhl and others 1996 for details). The term “habitat” was defined as primary habitat capable of supporting a self-replacing population. Separate judgments were made for the historical and current periods and for each of the 3 future options in the two EIS planning areas [Eastern Oregon and Washington (EEIS), and the Upper Columbia River Basin (UCRB)].

For each timeframe and planning area, the experts were asked to first rate the species’ likely distribution based only on habitat conditions on the Federal lands and the natural history characteristics of the species. The federal habitat judgments concerned potential population distribution across Federal land (FS and BLM only) based on population changes associated with habitat, environmental stochasticity, or natural catastrophes.

Then, panelists were asked to rate the cumulative effects on species populations across all ownerships given habitat conditions across all ownerships, the natural history of the species, and all other influences (such as, water pollution, trapping, etc.) on the species. The cumulative effects judgments concerned likely population response to management of federal habitat, population change associated with habitat, environmental stochasticity and natural catastrophes, changes in non-federal habitat, and other non-habitat influences.

Expert judgments were registered by likelihood voting using a structured outcome scale (fig. C-1). The outcome scale describes five distinct possible outcomes for the species or its habitat along a gradient ranging from broadly-distributed, with high likelihood of persistence, to poorly-distributed, with high likelihood of extirpation. For each judgment, each expert spread 100 likelihood votes across these five outcomes.

We calculated for each species the mean likelihood score for each outcome from individual experts’ scores, then the weighted mean outcome (table C-2). The weighted mean was calculated by assigning a value to each of the outcome categories (Outcome 1 value=1, Outcome 2 value=2, etc.), multiplying the mean likelihood of that outcome by its assigned value, adding these products for all outcomes and then dividing by 100. The resulting weighted mean can be compared across time periods and across future options.

Table C-1—Mean viability outcomes for evaluation of ICBEMP management alternatives. Mean outcomes were calculated as the weighted mean of average likelihood scores in each outcome.

<sup>1</sup> Group: PLT - vascular plants; AMP - amphibians; REP - reptiles; WAT - waterbirds and shorebirds; GAM - gamebird; RAP - raptor; CAV - cavity nester; FOR - forest birds; GS - grassland/shrub birds; RIP - riparian birds; WD - woodland birds; BAT - bat; SMM - small mammal; CAR - carnivore; UNG - ungulate.

<sup>2</sup> Area: EEIS BLM/FS - Eastern Oregon and Washington planning area, BLM and Forest Service lands only; EEIS CumEff - all lands in Eastern Oregon and Washington planning area; UCRB BLM/FS - Upper Columbia Basin planning area, BLM and Forest Service lands only; UCRB CumEff - all lands in Upper Columbia Basin planning area.

<sup>3</sup> Period / Option: H - historical pre-European settlement period; C - current; 1 - Option 1; 2 - Option 2; 3 - Option 3

<sup>4</sup> Species for which panelists' scores were adjusted by Science Team. Scores were adjusted when considered to reflect a misinterpretation or incomplete understanding of the management alternatives or their outcomes, or the species ecology.

<sup>5</sup> Mean outcome for alternative departs from current outcome by greater than or equal to 0.50 units. Outcomes reported in table were rounded to 0.1 units; but, differences were calculated to 0.01 units. Hence, departure calculated from the table may be misleading.

Table C-2—Mean likelihood scores of viability outcomes for selected species or habitat and species groups for evaluation of ICBEMP management options. Likelihood scores for each period or option to 100 points. High scores indicate high likelihood of an outcome. Means are calculated from the individual likelihood scores of panelists.

## APPENDIX D.

### CURRENT AND PROJECTED OUTCOMES FOR SPECIES WITH CURRENT OUTCOMES OF 4 OR 5.

(See appendix C for presentation of definitions and outcomes of viability for individual species.)

This appendix presents projected habitat outcomes on Forest Service and Bureau of Land Management lands (outcome rating system is described in appendix C) for individual species with current Outcomes of 4 and 5 (patchy/poorly distributed habitat with concern of extirpation/viability loss). Outcomes for vascular plant and vertebrate species were analyzed in two EIS planning areas of the Interior Columbia Basin Ecosystem Management Project--eastern Oregon and Washington, (EEIS) (tables D-1, D-2, and D-3); and, Idaho and western Montana, (UCRB) (tables D-4, D-5, and D-6).

The analysis is intended to describe likely future conditions for habitats and species given specific management options, and provide for comparison of those conditions to current conditions. Projected future conditions that result in improvements from current conditions should generally be considered as positive outcomes. Projected declines from current conditions may be viewed as negative.

The risk of extirpation/viability loss for a given species was estimated in two ways: (1) by a weighted mean Outcome of 4 or 5, and (2) by the number of likelihood points in Outcome 5 (see Evaluation of Alternatives--Terrestrial, Methodology section). The Science Integration Team chose 20 or more points in Outcome 5 as a conservative threshold of extirpation. Tables D-1 and D-4 display the species with 20 or more risk likelihood points in Outcome 5 for current conditions or three management options. A species with a "D5" listing in these tables would have the highest risk of extirpation/viability loss compared with other scores and outcomes. To be considered an "increaser," weighted mean outcome needed to improve by 0.5 or more from the current condition for a given species.

Option 1 results in the highest number of species at risk of extirpation with 20 or more points in Outcome 5 compared to the other options. Options 2 and 3 equally, would have the lowest number of species at risk of extirpation. As a group, carnivores and ungulates would have relatively higher risk of extirpation/viability loss, compared with other species groups considered in this assessment. Option 1 would result in the highest number of species (25 in UCRB, and 19 in EEIS) that change from a high likelihood of persistence and viability of having a risk of extirpation/viability loss, out of the total species analyzed (132 and 141, respectively). Percentage-wise, Option 1 would have a negative effect on species, while Options 2 and 3 effect a relatively low number of species.

Options 2 and 3 would result in significant improvements in conditions and viability outcomes for 15 to 20 species (tables D-3 and D-5), whereas Option 1 would not improve conditions for any species. Each option would result in declining conditions for at least some species (tables D-2 and D-6). "Decreaser" species have a weighted mean score of 3.4 or less for current conditions with projected outcomes for an option being 3.5 or greater.

# APPENDIX E.

## COMMON AND SCIENTIFIC NAMES OF SPECIES DISCUSSED IN THE DOCUMENT.

Common name	Scientific name <sup>1</sup>
<b>Flora:</b>	
Alder	<i>Alnus</i> <i>hirsuta</i>
Bitter brush	<i>Purshia</i> <i>tridentata</i> (Pursh) DC.
Blue-leaved penstemon	<i>Penstemon</i> <i>glaucus</i>
Broad-fruit mariposa	<i>Calochortus</i> <i>nitidus</i>
Brome-grass	<i>Bromus</i> L.
Buck rush	<i>Ceanothus</i> <i>cuneatus</i> (Hook.) T. & G.
Cheatgrass	<i>Bromus</i> <i>tectorum</i> L.
Clustered lady's-slipper	<i>Cypripedium</i> <i>fasciculatum</i>
Crenulate grape-fern	<i>Botrychium</i> <i>crenulatum</i>
Crested wheatgrass	<i>Agropyron</i> <i>cristatum</i> (L.) Gaertn.
Cronquist's stickseed	<i>Hackelia</i> <i>cronquistii</i>
Douglas-fir	<i>Pseudotsuga</i> <i>menziesii</i> (Mirbel) Franco.
Grand fir	<i>Abies</i> <i>grandis</i> (Dougl.) Forbes
Green-tinged paintbrush	<i>Castilleja</i> <i>chlorotica</i>
Howellia	<i>Howellia</i> <i>aquatica</i>
Howell's gumweed	<i>Grindelia</i> <i>howellii</i>
Huckleberries	<i>Vaccinium</i> L.
Idaho fescue	<i>Festuca</i> <i>idahoensis</i> Elmer
Juniper	<i>Juniperus</i> L.
Kentucky bluegrass	<i>Poa</i> <i>pratensis</i> L.
Knapweed	<i>Centaurea</i> L.
Leafy spurge	<i>Euphorbia</i> <i>esula</i> L.
Lemhi penstemon	<i>Penstemon</i> <i>lemprieri</i>
Lodgepole pine	<i>Pinus</i> <i>contorta</i> Dougl.
Long-bearded mariposa-lily	<i>Calochortus</i> <i>longebarbatus</i> var. <i>longebarbatus</i>
Macfarlane's four-o'clock	<i>Mirabilis</i> <i>macfarlanei</i>
Malheur wire-lettuce	<i>Stephanomeria</i> <i>malheurensis</i>
Manzanita	<i>Arctostaphylos</i> Adans.
Mountain hemlock	<i>Tsuga</i> <i>mertensiana</i> (Bong.) Carr.
Mt. Mazama collomia	<i>Collomia</i> <i>mazama</i>
Mulford's milk-vetch	<i>Astragalus</i> <i>mulfordiae</i>

Osgoodmountains milkvetch	<i>Astragalus yoder-williamsii</i>
Palouse goldenweed	<i>Haplopappus liatrisiformis</i>
Payson's milkvetch	<i>Astragalus paysonii</i>
Peck's mariposa-lily	<i>Calochortus longebarbatus</i> var. <i>Peckii</i>
Picabo milkvetch	<i>Astragalus oniciformis</i>
Ponderosa pine	<i>Pinus ponderosa</i> Dougl.
Pygmy monkeyflower	<i>Mimulus pygmaeus</i>
Sagebrush	<i>Artemisia</i> L.
Spalding's campion	<i>Silene spaldingii</i>
Subalpine fir	<i>Abies lasiocarpa</i> (Hook.) Nutt.
Suksdorf's lomatium	<i>Lomatium suksdorffii</i>
Thompson's clover	<i>Trifolium thompsonii</i>
Twin-spike moonwort	<i>Botrychium paradoxum</i>
Upward-lobed moonwort	<i>Botrychium ascendens</i>
Washington monkeyflower	<i>Mimulus washingtonensis</i> var. <i>washingtonensis</i>
Washington polemonium	<i>Polemonium pectinatum</i>
Weak milk-vetch	<i>Astragalus solitarius</i>
Western hemlock	<i>Tsuga heterophylla</i> (Raf.) Sarg.
Western juniper	<i>Juniperous occidentalis</i> Hook.
Western redcedar	<i>Thuja plicata</i> Donn.
Western white pine	<i>Pinus monticola</i> Dougl.
Wheat	<i>Triticum aestivum</i> L.
White bark pine	<i>Pinus albicaulis</i> Engelm.
White fir	<i>Abies concolor</i> (Gord. & Glend.) Lindl.
Willow	<i>Salix</i> L.

#### Fish:

Bass	<i>Micropterus</i> spp.
Bull trout	<i>Salvelinus confluentus</i>
Brook trout	<i>Salvelinus fontinalis</i>
Chinook salmon	<i>Oncorhynchus tshawytscha</i>
Goose Lake sucker	<i>Catostomus occidentalis lacusanserinus</i>
Klamath Largescale sucker	<i>Catostomus snyderi</i>
Lahontan Cutthroat trout	<i>Oncorhynchus clarki henshawi</i>
Lost River sucker	<i>Deltistes luxatus</i>
Malheur sculpin	<i>Cottus bairdi</i> spp.
Margined sculpin	<i>Cottus marginatus</i>
Pacific lamprey	<i>Lampetra tridentata</i>
Pit-Klanath Brook lamprey	<i>Lampetra lethophaga</i>

Pygmy whitefish	<i>Prosopium coulteri</i>
Rainbow trout	<i>Oncorhynchus mykiss</i>
Redband trout	<i>Oncorhynchus mykiss</i> ssp.
Shorthead sculpin	<i>Cottus confusus</i>
Shortnose sucker	<i>Chasmistes brevirostris</i>
Slender sculpin	<i>Cottus tenuis</i>
Sockeye salmon	<i>Oncorhynchus nerka</i>
Steelhead	<i>Oncorhynchus mykiss</i> mykiss
Torrent sculpin	<i>Cottus rhotheus</i>
Walleye	<i>Stizostedion vitreum</i> vitreum
Westslope cutthroat trout	<i>Oncorhynchus clarki</i> lewisi
Wood River Bridgelip sucker	<i>Catostomus columbianus</i> hubbsi
Wood River sculpin	<i>Cottus leiopomus</i>
Yellowstone cutthroat trout	<i>Oncorhynchus clarki</i> bouvieri

**Birds:**

Ash-throated flycatcher	<i>Myiarchus cinerascens</i>
Bald eagle	<i>Haliaeetus leucocephalus</i>
Band-tailed pigeon	<i>Columba fasciata</i>
Barred owl	<i>Strix varia</i>
Black-backed woodpecker	<i>Picoides arcticus</i>
Black-capped rosy finch	<i>Leucosticte arctoa</i>
Black-chinned hummingbird	<i>Archilochus alexandri</i>
Blue grouse	<i>Dendragapus obscurus</i>
Bobolink	<i>Dolichonyx oryzivorus</i>
Boreal owl	<i>Aegolius funereus</i>
Brewer's blackbird	<i>Euphagus cyanocephalus</i>
Brewer's sparrow	<i>Spizella breweri</i>
Broad-tailed hummingbird	<i>Selasphorus platycercus</i>
Burrowing owl	<i>Athene cunicularia</i>
Bushtit	<i>Psaltriparus minimus</i>
Chestnut-backed chickadee	<i>Parus rufescens</i>
Chipping sparrow	<i>Spizella passerina</i>
Chukar	<i>Alectoris chukar</i>
Columbia sharp-tailed grouse	<i>Tympanuchus phasianellus columbianus</i>
Common loon	<i>Gavia immer</i>
Common snipe	<i>Gallinago gallinago</i>
Cooper's hawk	<i>Accipiter cooperii</i>
Downy woodpecker	<i>Picoides pubescens</i>
Ferruginous hawk	<i>Buteo regalis</i>

Flammulated owl	<i>Otus flammeolus</i>
Grasshopper sparrow	<i>Ammodramus savannarum</i>
Gray partridge	<i>Perdix perdix</i>
Greater sandhill crane	<i>Grus canadensis tabida</i>
Great gray owl	<i>Strix nebulosa</i>
Green-tailed towhee	<i>Pipilo chlorurus</i>
Hammond's flycatcher	<i>Empidonax hammondi</i>
Harlequin duck	<i>Histrionicus histrionicus</i>
Horned lark	<i>Eremophila alpestris</i>
Lark bunting	<i>Calamospiza melanocorys</i>
Lark sparrow	<i>Chondestes grammacus</i>
Lazuli bunting	<i>Passerina amoena</i>
Lewis' woodpecker	<i>Melanerpes lewis</i>
Loggerhead shrike	<i>Lanius ludovicianus</i>
Long-billed curlew	<i>Numenius americanus</i>
Long-eared owl	<i>Asio otus</i>
Merlin	<i>Falco columbarius</i>
Mountain quail	<i>Oreortyx pictus</i>
Northern goshawk	<i>Accipiter gentilis</i>
Northern pygmy-owl	<i>Glaucidium gnoma</i>
Northern spotted owl	<i>Strix occidentalis caurina</i>
Olive-sided flycatcher	<i>Contopus borealis</i>
Pileated woodpecker	<i>Dryocopus pileatus</i>
Pygmy nuthatch	<i>Sitta pygmaea</i>
Red-eyed vireo	<i>Vireo olivaceus</i>
Red-naped sapsucker	<i>Sphyrapicus nuchalis</i>
Red-winged blackbird	<i>Agelaius phoeniceus</i>
Ring-necked pheasant	<i>Phasianus colchicus</i>
Rufous hummingbird	<i>Selasphorus rufus</i>
Rufous-sided towhee	<i>Pipilo erythrrophthalmus</i>
Sage grouse	<i>Centrocercus urophasianus</i>
Sage sparrow	<i>Amphispiza belli</i>
Sage thrasher	<i>Oreoscoptes montanus</i>
Short-eared owl	<i>Asio flammeus</i>
Southern red-backed vole	<i>Clethrionomys gapperi</i>
Spotted sandpiper	<i>Actitis macularia</i>
Swainson's hawk	<i>Buteo swainsoni</i>
Three-toed woodpecker	<i>Picoides tridactylus</i>
Upland sandpiper	<i>Bartramia longicauda</i>
Vaux's swift	<i>Chaetura vauxi</i>

Veery	<i>Catharus fuscescens</i>
Vesper sparrow	<i>Pooecetes gramineus</i>
Western bluebird	<i>Sialia mexicana</i>
Western meadowlark	<i>Sturnella neglecta</i>
Western red-backed vole	<i>Clethrionomys californicus</i>
Western screech owl	<i>Otus kennicottii</i>
Western snowy plover	<i>Charadrius alexandrinus nivosus</i>
Western tanager	<i>Piranga ludoviciana</i>
White-breasted nuthatch	<i>Sitta carolinensis</i>
White-headed woodpecker	<i>Picoides albolarvatus</i>
White-winged crossbill	<i>Loxia leucoptera</i>
Wild turkey	<i>Meleagris gallopavo</i>
Willet	<i>Catoptrophorus semipalmatus</i>
Williamson's sapsucker	<i>Sphyrapicus thyroideus</i>
Willow flycatcher	<i>Empidonax traillii</i>
Wilson's warbler	<i>Wilsonia pusilla</i>
Winter wren	<i>Troglodytes troglodytes</i>
Wood duck	<i>Aix sponsa</i>
Woodpecker	<i>Picoides</i> spp.
Yellow-billed cuckoo	<i>Coccyzus americanus</i>
Yellow-breasted chat	<i>Icteria virens</i>
Yellow warbler	<i>Dendroica petechia</i>

#### Mammals:

American marten	<i>Martes americana</i>
Black bear	<i>Ursus americanus</i>
California bighorn sheep	<i>Ovis canadensis californiana</i>
Chipmunk	<i>Tamias</i> spp.
Elk	<i>Cervus elaphus</i>
Fisher	<i>Martes pennanti</i>
Fringed myotis	<i>Myotis thysanodes</i>
Gray wolf	<i>Canis lupus</i>
Grizzly bear	<i>Ursus arctos</i>
Hoary bat	<i>Lasiurus cinereus</i>
Long-eared myotis	<i>Myotis evotis</i>
Long-legged myotis	<i>Myotis volans</i>
Lynx	<i>Lynx lynx</i>
Moose	<i>Alces alces</i>
Mountain lion	<i>Felis concolor</i>
Mule deer	<i>Odocoileus hemionus</i>

Northern flying squirrel	<i>Glaucomys sabrinus</i>
Pale western big-eared bat	<i>Plecotus townsendii pallescens</i>
Pronghorn antelope	<i>Antilocapra americana</i>
Pygmy rabbit	<i>Brachylagus idahoensis</i>
Rocky Mountain elk	<i>Cervus elaphus nelsonii</i>
Rocky Mountain gray wolf	<i>Canis lupis irremotus</i>
Silver-haired bat	<i>Lasionycteris noctivagans</i>
Spotted bat	<i>Euderma maculatum</i>
Squirrel	<i>Ammospermophilus</i> spp.
Washington ground squirrel	<i>Spermophilus washingtoni</i>
Western small-footed myotis	<i>Myotis ciliolabrum</i>
White tail deer	<i>Odocoileus virginianus</i>
White-tailed jack rabbit	<i>Lepus townsendii</i>
Wolverine	<i>Gulo gulo</i>
Woodland caribou	<i>Rangifer tarandus caribou</i>

#### **Amphibians and Reptiles:**

Coeur d'Alene salamander	<i>Plethodon idahoensis</i>
Common garter snake	<i>Thamnophis sirtalis</i>
Desert horned lizard	<i>Phrynosoma platyrhinos</i>
Longnose leopard lizard	<i>Gambelia wislizenii</i>
Mojave black-collared lizard	<i>Crotaphytus bicinctores</i>
Night snake	<i>Hypsirhynchus torquata</i>
Northern leopard frog	<i>Rana pipiens</i>
Painted turtle	<i>Chrysemys picta</i>
Rubber boa	<i>Charina bottae</i>
Sagebrush lizard	<i>Sceloporus graciosus graciosus</i>
Sharptail snake	<i>Contia tenuis</i>
Short-horned lizard	<i>Phrynosoma douglassii</i>
Spotted frog species A	<i>Rana pretiosa</i> sp. A
Spotted frog species B	<i>Rana pretiosa</i> sp. B
Striped whipsnake	<i>Masticophis taeniatus</i>
Tailed frog	<i>Ascaphus truei</i>
Western pond turtle	<i>Clemmys marmorata</i>
Western toad	<i>Bufo boreas</i>
Woodhouse's toad	<i>Bufo woodhousii</i>

**Quigley, Thomas M.; Haynes, Richard W.; Graham, Russell T., tech. eds.** 1996. Integrated scientific assessment for ecosystem management in the interior Columbia basin and portions of the Klamath and Great Basins. Gen. Tech. Rep. PNW-GTR-382. Portland, OR: U.S. Department of Agriculture, Forest Service, Pacific Northwest Research Station. 303 p.

The Integrated Scientific Assessment for Ecosystem Management in the Interior Columbia Basin links landscape, aquatic, terrestrial, social, and economic characterizations to describe biophysical and social systems. Integration was achieved through a framework built around six goals for ecosystem management and three different views of the future. These goals are: maintain evolutionary and ecological processes; manage for multiple ecological domains and evolutionary timeframes; maintain viable populations of native and desired non-native species; encourage social and economic resiliency; manage for places with definable values; and, manage to maintain a variety of ecosystem goods, services, and conditions that society wants. Ratings of relative ecological integrity and socioeconomic resiliency were used to make broad statements about ecosystem conditions in the Basin. Currently in the Basin high integrity and resiliency are found on 16 and 20 percent of the area, respectively. Low integrity and resiliency are found on 60 and 68 percent of the area. Different approaches to management can alter the risks to the assets of people living in the Basin and to the ecosystem itself. Continuation of current management leads to increasing risks while management approaches focusing on reserves or restoration result in trends that mostly stabilize or reduce risks. Even where ecological integrity is projected to improve with the application of active management, population increases and the pressures of expanding demands on resources may cause increasing trends in risk.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means of communication of program information (Braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, DC 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
