ABSTRACT

Warren, Debra D. 2005. Production, prices, employment, and trade in Northwest forest industries, all quarters of 2003. Resour. Bull. PNW-RB-247. Portland, OR: U.S. Department of Agriculture, Forest Service, Pacific Northwest Research Station. 171 p.

Provides current information on lumber and plywood production and prices; employment in the forest industries; international trade in logs, lumber, and plywood; volume and average prices of stumpage sold by public agencies; and other related items.

Keywords: Forestry business economics, lumber prices, plywood prices, timber volume, stumpage prices, employment (forest products industries), marketing (forest products), imports and exports (forest products).

PREFACE

Due to temporary unavailability of trade data, this report was delayed. In the interest of efficiency and timeliness, all four quarters of 2003 are being published in one book. This report presents current information on the timber situation in Alaska, Washington, Oregon, California, Montana, Idaho, and British Columbia, including data on lumber and plywood production and prices; timber harvest; employment in forest products industries; international trade in logs, pulpwood, chips, lumber, and plywood; log prices in the Pacific Northwest; volume and average prices of stumpage sold by public agencies; and other related items.

Cooperation in supplying data has been received from the following sources: U.S. Department of Agriculture, Forest Service, Forest Inventory and Economics Research Staff in Washington, DC; Washington State Department of Natural Resources and Employment Security Department; Oregon State Department of Forestry and Department of Employment; California State Department of Employment and Department of Conservation; Montana State Forester and State Employment Service; Idaho State Department of Public Lands and Department of Employment; Alaska State Department of Labor and Department of Natural Resources of the Division of Lands; U.S. Department of Commerce; U.S. Department of the Interior, Bureau of Land Management and Bureau of Indian Affairs; British Columbia Department of Industrial Development, Trade, and Commerce; and a number of private industry associations, firms, and individuals.

The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Seattle Customs District includes all coastal and inland ports in the State of Washington, except Longview and Vancouver. Columbia-Snake Customs District includes all Oregon ports and Longview and Vancouver, Washington. Anchorage Customs District is the State of Alaska. San Francisco Customs District includes Monterey and all ports north of Monterey, California.

The statistical data are from secondary sources and are brought together to make such information more readily available. Sources are indicated for each table and can be contacted directly for means used in data collection.

Readers are cautioned that unit values should not be interpreted as accurate indicators of prices. Unit values for individual trade flows, especially those involving small volumes, frequently vary widely within a year, across origins or destinations, and through time.

Conversion Factors Used in This Report

For logs: 4.53 cubic meters equals 1 thousand board feet

For lumber: 2.36 cubic meters equals 1 thousand board feet

For veneer: 92.9 square meters equals 1 thousand square feet

For plywood: .885 cubic meters equals 1 thousand square feet (3/8-inch basis)

For chips and pulpwood: .907 metric tons equals 1 short ton

Western Lumber Production and Prices

- Softwood lumber production

A total of 17.1 billion board feet of softwood lumber was produced in the Western United States in 2003, and the total U.S. figure was 35.9 billion board feet (table 1). Total softwood lumber production in the fourth quarter of 2003 was 8.9 billion board feet, and 48.0 percent of that was produced in the West.

- Wholesale lumber prices

Average wholesale prices increased in 2003 for most of the selected lumber products (table 7). Year-end 2003 prices averaged a 4.4-percent increase from year-end 2002, across all five selected lumber products.

Plywood Production and Prices

- Plywood production in 2003

United States softwood structural panel board production in 2003, at 27,310 million square feet (3/8-inch basis), decreased 3.0 percent from 2002. Production in the fourth quarter of 2003 was 6.9 million board feet, down from the third quarter volume of 7.2 (table 1).

Wholesale prices of selected plywood products increased from 2002 to 2003. Year-end 2003 prices averaged a 21.2-percent increase (table 8) from year-end 2002 prices.

Employment in Forest Products Industries

- Employment numbers for 2003

The number of persons employed in the lumber and wood products industries decreased in 2003 in Oregon and Washington (table 21). Once again, third quarter 2003 employment numbers were higher than the other quarters.

In Oregon and Washington, there were 9.2 direct jobs per million board feet of timber harvested in 2003 (using the harvest figures from table 16).

Log, Pulp, and Chip Exports

- Washington and Oregon log exports

Log exports from Washington and Oregon ports totaled 561.6 million board feet in 2003, as compared to 599.4 million board feet in 2002. In 2003, Washington Customs District exported 176.7 million board feet of logs to all countries, and Oregon Customs District exported 385.0 (table 27).

- Log export prices for Washington and Oregon

Softwood log exports from Washington and Oregon ports averaged \$658.05 (per thousand board feet) in 2003, down from the 2002 average of \$659.48. The fourth quarter 2003 values for both states averaged \$657.48 (table 29), up from \$639.60 in the third quarter of 2003.

- Log exports from California and Alaska

San Francisco Customs District exported 76 thousand board feet of logs in 2003, compared with 1,436 in 2002 (table 30). The Anchorage Customs District exported 305.6 million board feet of logs in 2003, compared with 287.0 in 2002 (table 31).

- Pulp volumes in the Pacific Northwest

The Seattle, Columbia-Snake, and San Francisco Customs Districts showed mostly decreases in pulp export volumes in 2003 (table 48). The Anchorage Customs District showed no pulp exports in 2003.

- Average value of pulp exports

The Seattle and Columbia-Snake Customs Districts showed an increase in the average value for both grades of pulp exports from 2002 to 2003 (table 49).

- Chip exports

Three of the customs districts reflected a decrease in the volume of chips exported in 2003; only Anchorage showed an increase. The average values of chips decreased in all but the Seattle Customs District (table 50).

Lumber, Plywood, and Veneer

- Lumber export volumes from the Northwest

The Columbia-Snake Customs District had a decrease in the volume of lumber exports from 68.9 million board feet in 2002 to 61.1 in 2003 (table 52). The Seattle Customs District had an increase of 2.3 percent. Southern California lumber export volumes fell slightly, from 125.1 million board feet in 2002 to 117.4 in 2003 (table 55). Northern California lumber exports increased 54.5 percent in 2003 (table 56). Alaska increased lumber export volumes to 1.2 million board feet in 2003 (table 57).

- Average value of lumber exports

In the Seattle and Columbia-Snake Customs Districts, the average value of lumber exports increased from \$642.65 (per thousand board feet) in 2002 to \$667.87 in 2003 (table 54). Southern California lumber export prices rose slightly in 2003 (table 55). Northern California (table 56) lumber export prices decreased from \$683.46 in 2002 to \$361.57 in 2003. Alaska lumber prices (table 57) increased from \$49.56 in 2002 to \$1,023.87 in 2003.

- Oregon and Washington lumber imports

The Seattle Customs District imported 3.9 billion board feet of lumber in 2003, mostly from Canada (table 70). The Columbia-Snake Customs District imported 166.1 million board feet in 2003, compared with 163.9 million in 2002 (table 72).

- Softwood plywood exports

The 2003 softwood plywood exports mostly decreased from 2002. The average value of softwood plywood exported from the Seattle Customs District increased in 2003 (table 74).

- Softwood veneer exports

In 2003, softwood veneer export volumes rose in Washington and dropped in Oregon (table 76). The hardwood veneer export volumes increased in Oregon, but decreased in Washington. The prices fell sharply in Oregon, but increased slightly in Washington.

Timber Sold by Forest Service Regions

- Sold volume in Northern Region

Not all ownership numbers are available, but the amount of timber sold on National Forest lands in Montana and northern Idaho decreased 24.8 percent from 2002 to 2003 (table 77).

- Sold volume in northern California

In 2003, the volume of timber sold on USDA Forest Service lands in northern California decreased 22.0 percent from the 2002 total (table 85).

- Sold volume in Washington and Oregon

Oregon and Washington showed an increase of 23.0 percent in the amount of timber sold on USDA Forest Service lands from 2002 to 2003 (table 91).

- Sold volume in Alaska

In 2003, the volume of timber sold on National Forest lands in Alaska was 56.1 million board feet, compared to 23.7 million board feet in 2002 (table 97). Average values decreased from \$41.65 in 2002 to \$23.05 in 2003 (table 98).

^a SIC 24 = Standard Industrial Classification for lumber and wood products, in 2001 the SIC code 24 has been replaced by the NAICS code 321 wood product manufacturing. Logging is no longer included in NAICS 321.

^b SIC 8 = Forestry services. Starting in 2001 this is NAICS code 113 and includes forestry services and logging. The 2000 SIC code 8 gives some indication of the size of employment in forestry services without logging and was added for comparison of 2000 data to 2001 NAICS data.

^c SIC 24 data 1999 are directly comparable, therefore, SIC 08 data are not needed.

Note: D = data is not shown to avoid disclosure of data for individual employers.

^a SIC 24 = Standard Industrial Classification for lumber and wood products, in 2001 the SIC code 24 has been replaced by the NAICS code 321 wood product manufacturing. Logging is no longer included in NAICS 321.^b SIC 8 = Forestry services. Starting in 2001 this is NAICS code 113 and includes forestry services and logging. The 2000 SIC code 8 gives some indication of the size of employment in forestry services without logging and was added for comparison of 2000 data to 2001 NAICS data.^c SIC 24 data for 1998 and 1999 are directly comparable, therefore, SIC 08 data are not needed.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Data are compiled from Department of Commerce records at the end of each quarter.

Source: U.S. Department of Commerce. The valuation definition used in the export statistics is the value at the seaport or border port of exportation. It is based on the selling price (or cost if not sold) including inland freight, insurance, and other charges to the port of exportation.

Data are compiled from Department of Commerce records at the end of each quarter.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Before 1984, prices for stumpage on National Forest lands are statistical high bids. The statistical high bid is defined as the bid price minus credits for road costs; it includes an allowance for sale-area betterment (K-V funds). Beginning in 1984, prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^a Prices received for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Prices for stumpage on National Forest land are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^b Excludes sales under \$20,000.

^a Prices for individual sales may vary significantly from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Before 1984, prices for stumpage on National Forest lands are statistical high bids. The statistical high bid is defined as the bid price minus credits for road costs; it includes an allowance for sale-area betterment (K-V funds). Beginning in 1984, prices for stumpage on National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^b Includes Port Orford-cedar, Alaska cedar, incense cedar, and western redcedar.

^a Preliminary.

^b Prices for individual sales may vary from the averages shown in this table because of differences in species mix, quality, road costs, logging and processing costs, size and length of sale, number of bidders, and other related price determinants. Prices for stumpage in National Forest lands are high bid value. Road costs and an allowance for sale-area betterment are included in the bid.

^c Does not include noble fir or Shasta red fir.

The **Forest Service** of the U.S. Department of Agriculture is dedicated to the principle of multiple use management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the States and private forest owners, and management of the National Forests and National Grasslands, it strives—as directed by Congress—to provide increasingly greater service to a growing Nation.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

USDA is committed to making its information materials accessible to all USDA customers and employees.
