

# **Restoration and Fuel Treatment of Lake Tahoe's Riparian Forests**

**Principal Investigator: Malcolm North**

## **Annual Accomplishments Update (October 1, 2008-September 30, 2009)<sup>†</sup>:**

All field work has been completed successfully with all sites visited and sampled. Plot data is currently being entered into computer databases. Over 650 fire scars are being processed (planned, sanded, crossdated, aged, and all fires dated). October through June 2010 will focus on analyzing the data and writing up the results for peer reviewed journal manuscripts.
