

## *Routes with Undefined Trav Codes in Alternative A and Why They Changed in Action Alts*

### *Clearwater NF Travel Plan*

RP-601

#### *What This Report Shows:*

*Some routes had a TravCode of "UND" in Alternative A. TravCode describes the set of restrictions that apply to the summer season vehicles that will be shown on the Motor Vehicle Use Map or MVUM. Alternative A describes the existing condition - the current system of roads and trails. It is based on the 2005 Travel Guide supplemented by NEPA decisions since the guide was published, error corrections, and some system roads that should have been included. When it was obvious that a certain TravCode applied as in case of errors like major roads overlooked, or TravCode specified from a NEPA decision then the appropriate code was used. For other roads added as in the case of roads on former DAW lands, the TravCode was listed as UND since no travel decision had been made.*

*There are also some routes that had not been described in the 2005 Travel Guide. Suggestions for additional routes that were received as part of the Travel Planning process are one example. Others include roads that have long been overgrown and not travellable with vehicles, and storage trails that are still considered part of the trail system but have not been maintained in a long time and also generally not travellable with vehicles. The vast majority of these routes, owing to their condition were not described in either the 2005 Travel Guide or any previous editions. These types of routes received a TravCode of "UND" or undefined in Alternative A.*
