

Routes with Undefined Trav Codes in Alternative A and their TravCodes in Action Alternatives

RP-602

Clearwater NF Travel Plan

What This Report Shows:

Alternative A represents the existing condition. It is based on the routes in the 2005 Travel Guide supplemented by restriction changes or additions from succeeding NEPA decisions, correction of obvious errors and the addition of routes that should be considered. Examples of the latter are routes suggested by users in the travel planning process and routes that have never been listed in the travel guide due to their overgrown or unmaintained status.

In the case of NEPA decisions, and obvious error corrections, the appropriate Travel Code was known. Routes other than these were coded UND to reflect their undetermined travel status. This report shows the TravCode that was assigned to these routes in each of the action alternatives and a code explaining the rationale for the change.
