

Routes Not Probable for Motorized Travel List

RP-705

Clearwater NF Travel Plan

What This Report Shows:

These are system routes that have not appeared in the 2005 Travel Guide.

The roads had not been listed because best information on their condition was that they were completely overgrown and impassable to vehicles.

The trails were not listed because they were in "storage" status and had not received maintenance in 10+ years and were very unlikely to be travelable with trail vehicles based on their condition or they were not in the travel guide because they were only recently suggested by the public during project development and scoping.

During the Travel Plan process none of these routes were considered likely to be designated for motorized travel. The report shows what restriction was proposed for each route in the Action Alternatives.
