

## Elk City Wagon Road Enhancement Project

This is an enhancement project to preserve approximately one (1) mile of the Elk City Wagon Road between the Big Switchback and Newsome.

Because of fire season and closures in the area, no physical work will be accomplished this year.

The old signage installed in 1989 was replaced with new signs. Thanks to Melvin Gribble and Friends of the Wagon Road volunteers three interpretive signs and six wood routed signs were installed in July just in time for the Elk City Wagon Road Tour.
