15. Estimated Project Start Date: Spring/Summer '08	16. Estimated Project Completion Date: Fall '08
---	---

17. How will cooperative relationships among people that use federal lands be improved? List known partnerships or collaborative opportunities. Continuing the cooperative effort to eradicate noxious weeds will strengthen the relationship between private landowners, county residents, and Forest users who share the same goals.

18. How is this project in the best interest of the community? Identify benefits to communities. Noxious weeds are a known threat to the natural ecosystems of the Western U.S. Native plant and wildlife species are severely impacted by these weeds which will continue to spread without our efforts to control them. Communities will realize improved habitat conditions for wildlife and better grazing opportunities for livestock and wildlife. Maintaining healthy native plants and ecosystems should provide an economic benefit to the area as well through increased visitor numbers during the summer and fall hunting seasons.

19. How does the project benefit federal lands/resources? Control of noxious weed populations is essential to efforts to maintain healthy native flora and fauna and properly functioning ecosystems.
