0022247-001	Please consider the damage to the wetlands with the interference of man, which has destroyed many wetlands here in Michigan. Use us as an example on what not to do to Copper River Delta wetlands.
-------------	---

0022249-001	As an American citizen I not only urge you to save these ever valuable and irreplaceable wetlands I demand it and we expect our government to behave in the best interest of its people. These wetland act as an eco-buffer a filtering system for an already damaged eco-system. These areas are vital to the health and recovery of this area that has already been so damaged by human greed and carelessness. Now is the only time later is to late save and permanently protect this habitat It is time to respect and cherish this place we call mother earth or perish in ignorance Save these wetlands. Do it now.
