I realize this is a very large area we are talking about and that it is federal public land. My concern is that the revisions are increasing the restrictions to these public lands. I know it is superficially viewed as a snowmobilers vs. skiers issue, but it is more than that. I, personally, own a snowmobile and I also own cross country skies, snowshoes, and love to winter camp. Did I mention I love wildlife and scenery photography? As you can see I view this land as recreation dream land and want to continue to have access to it. I feel like this has been presented as a conflict in user groups issue when it is really an issue of too few access points.
