

SAR - Forest Plan - Chapter 3 - 111

Comment # Comment

0021786-002	Put a primitive prescription on Bear trap Bay in Gravina - a dedicated group of Cordovans who met all summer in '99 specifically wanted to see it protected.
0023118-006	1. Power Creek primitive area
0026732-003	Second, I urge you to reclassify the head of Fidalgo as a primitive area. This was one designation that received 100% support from all of the local residents involved in the planning process This is a special area to a lot of Cordovans, and they feel strongly about there being no development in this area, including the permitting of float houses. Please restore this designation.
0027575-008	OTHER SPECIAL AREAS Head of Port Gravina, including Beartrap: I recommend a 111-Primitive Management area prescription in place of the backcountry prescription
0028298-002	-- Apply the 111 - Primitive Management Area prescription to the head of Port Gravina to protect Beartrap Bay.
0029063-014	We also recommend that the following CNF Planning Units adjacent to the Minimal Management and Wilderness Zones boundaries of the Kenai NWR be placed in Management Category I, but in prescription 111 (Primitive): K036, K044, K045, K050, K052 and K053.
0034412-008	OTHER SPECIAL AREAS Head of Port Gravina, including Beartrap: The Prince William Sound Audubon Society is against the backcountry prescription. We endorse instead a 111-Primitive Management area prescription that was as originally suggested in 1999.
0035543-004	OTHER SPECIAL AREAS Head of Port Gravina, including Beartrap: The Prince William Sound Audubon Society is against the backcountry prescription. We endorse instead a 111-Primitive Management area prescription that was as originally suggested in 1999.
