0004575-001

I very strongly request protection for the Copper River Delta. Please keep this area and all other forest service land - wild and pristine.

0004838-001

Please do not allow roads to be built through the Copper River Delta, a pristine wetland. Do not allow logging of the 100-yr. old.

0022567-001

This letter should express my concern of the diminishing land of the Alaskan Copper River Delta.

It is important that we preserve this exceptional part of Alaska.

0022568-001

As I said, Alaska's Copper River Delta is such a great place with a lot of natures around, we need to protect and support them.

However, tress, coal mine, oil and gas are all very important resources. Therefore, our responsibility is to think about the way we can make us happy and good for the nature.

To keep Alaska's Copper River Delta wild forever, we need to support them well and have to think of the ways we can protect them better.

0022569-001

Hello my name is Adam Sapsara and I'm writing to you with a concern about saving Alaska's Copper River Delta.

we should do the Eyak, ourselves, and the Copper River Delta a favor and stop the destruction of this beautiful, environment.

0022570-001

We were given a paper to read about Alaska's Copper River Delta. I read it through carefully and I believe that the Delta should be preserved.

0022571-001

I understand that the federal government is making a decision concerning the Copper River Delta. This decision will have a great impact on the area's wildlife and on the people who live in the area, Since this plan will be used to govern all decisions for at least the next decade, I hope that the decision that is reached will protect the people, wildlife and the dunlins.

0022853-001

I definitely think that all of the Copper River Delta wetlands are valuable and should be protected.

0022862-001 :

The copper river area is the only place I've ever been where there was a dipper hanging by the creek in case you wanted a drink as you went by. The air tastes good to breathe. Let's please keep some parts of the earth as they were made.

0021128-001

I am writing in regard to my concern for the Copper River Delta region and its adjoining ecosystems, specifically the plan for road building in this area enabling the logging of 8,000 acres of virgin rainforest by Chugach Alaska Corporation.

0021155-001

Please do what you can to prevent the CAC proposed road building project through the Copper River Delta. Besides the well known salmon issues, we are just beginning a renaissance of understanding of the significance of wilderness and all that it holds. We could have untold biological treasures in that area if proper careful scientific methods would continue in protected, undamaged wilderness, or we could have yet another irreparable mess. We have to change our ways.

0021849-001

do everything in your power to protect the Copper River Delta wetlands on both the east and west sides of the river.

0021855-001

save the Copper River Delta, before it's too late need to remain natural wilderness.

0021857-001

We should concentrate on preserving the Copper River Delta. The Delta holds a lot of life and supports a lot of different species. By conserving these areas, we will ensure that these animals will be here for the next generation.

0021858-001

The Copper River Delta should be left alone so that the animals won't have to look for another habitat that will allow them to survive. The environment will be greatly affected if the Copper River Delta is destroyed!

Comment # Comment

0021860-001

Please help to protect our Copper river wetlands permanently.

0021983-001

Please help to keep the Copper River Delta clean and national natural
No roads, logging or building !!!

We need to stop intruding in our national & natural forest.

0021984-001

When you consider where to Copper River Delta has to offer in the way of vital habitat, and the amount of wrong in this world over the destruction of habitat, you would have to once to the conclusion that the area absolutely must receive a nearby protected states. When I read about the sheer numbers of birds that rely on the wetland, about the importance of wetlands. Fish breeding and the balance of nature, you have a regular natural mecca up there, while we're down here scuffing around about tiny fragile slots of land there don't contain a fraction of the like this the Copper River Delta has. You know all the problems attendant on development. They are irremediable. stop trouble before it starts by protecting

0022058-001

. Dave we have made errors in taking care of
our everglades and I can only humbly hope that you will make the right decision and protect the Copper River Delta.

0022060-001

I strongly urge you to make the decision favoring the preservation of this wildlife refuge. Not only is the Copper River Delta the largest wetlands on the Pacific Coast, but it is also a staging area for 16 million birds.

0022111-001

I am writing to make a strong request that for the Copper River Delta steps be taken that will help keep it in its wild state forever.

0022195-001

0022267-001

I would like to ask the forest service to do all in their power to protect the delta.

0022277-001

0022339-001 My husband and I recently visited the Copper River Delta and are concerned regarding the impact that logging, road construction, oil and gas development will have on the fragile ecosystem. We feel these activities will be harmful to the environment and will impact not only the delta wildlife but also the native Eyak Indians in terms of loss of their culture and way of life. Our hope is that this delicate area will be protected and designated a natural wildlife preserve to be enjoyed by everyone as Denali National Park is today.

0022426-002

0022586-001 you have my total support for the conservation of the Copper River Delta.

0022592-001

I have recently read an article about Alaska's copper river delta, I want to see this wetland stay protected from people like you who only want to tear it down.

0022593-001

I too believe that it is very important to preserve the Copper River. I support you and your organization and their beliefs,

0022594-001

The Alaska Copper River Delta. Because of these reasons, I'm in favor of the idea of permanent protection, but yet still respecting existing rights and allowing traditional activities such as hunting, fishing, and motorized access for subsistence purposes. It's not just the big corporate projects for logging, coal mining, and oil and gas development that should be regulated, but also the little shops and stores. Slowly these little stores are taking more and more of the delta.

This is why I'm asking for your support on saving the Alaska Copper River Delta.

0022598-001

I support the proposal to continue the managing of the Copper River Delta over the next several decades. Permanent protection must be provided as soon as possible

Comment # Comment

0022807-001 This small step could be paralleled to the creation of Copper River Delta as a protected wilderness.

0022815-001 The Copper River Delta 700,000 acres in Alaska, east of Prince William Sound calls desperately for preservation.

0022818-001 I am aware that the Copper River Delta is in jeopardy because for years its area has been used because it's good for logging and oil development. If the US Forest Service takes a stand and preserves this area, than so many animals will be saved.

0022930-001 I am writing to you in reference to the 'Copper River Delta'

It is time to put a stop to all the destruction that is taking solve for the sake of greedy developers. As many of our national habitat are being destroyed by shortsightedness. we need to make a stand for the survival of wildlife and our ecosystems.

0023118-005

0023212-001 The wildness is still there and a road across the delta must never happen.

0026487-001

0027601-004 The inability to mitigate effects of a CAC road through the area or the loss of traditional hunting, fishing, and trapping activities on the east delta bring great concern for me as a resident of Cordova. Additionally, the unsettled question of jurisdictional authority over the waters of the Copper River Delta leaves the effect of a Wilderness designation on our delta fishery uncertain.

0027685-001 Please do what you can to protect the Copper River Delta. We care.

0029089-001

I am writing in regards to preservation of three very beautiful and important areas in Alaska. The first is the Copper River Delta and the Martin, Bering & Katalla Rivers.

Also, the Alaganik Slough and Martin & Bering Lakes should be protected as well as east and west of the Copper River.

0029138-001

One corporation has already begun building an access road across the delta to clear-cut its land 55 miles east of the Copper River.

0029145-002

I want the Copper, Martin, Bering, Katalla Rivers, Alaganik and Martin and Slough and Bering Lakes to be protected for us.

0029455-001

Preserving the Delta by purchasing a conservation easement on CAC's inholding and designating the Delta as wilderness would better serve the needs of people and wildlife.

0035408-005

Copper River Delta: The Forest Service should not allow designations that allow road construction, or other development in this area. . To allow development here would be criminal.

0035649-006

I support a roadless designation, and a ban on logging and mining, on the Copper River Delta. I'd like to see a strong effort to re-acquire the existing cross-delta road easement from Chugach Alaska Corporation.

0036267-002

Do everything you can to stop Chugach Alaska Corp. from building a road through the Delta. These big Co's with their mil \$ CEO's are out to ruin our heritage
