0026814-002	-- No commercial timber in the Glacier ranger District nor on Montague Island. Especially none adjacent to Native lands in the SW part of the Sound, nor anywhere on FS land on Montague. Native land clearcuts are more than enough on Montague.
-------------	---

0034929-007	Montague Island Timber Access Road Wildlands CPR supports obliteration, recontouring and revegetation of the Montague Island Timber Access Road. While obliteration may have some immediate, temporary impacts, the long term benefits of obliteration for wildlife, habitat and erosion prevention are overwhelming. Further, it is our understanding that this road was intended by the Forest Service to be destroyed once logging activities were completed.
