- 0439-003 Save the purity of our water. No mining and pollution of air quality.
- 0623-001 Despite what many politicians and business people say, the Exxon Valdez Oil Spill is not cleaned up. Scores of recreational beaches are scarred for at least our generation. This must never be forgotten. In an attempt to mitigate these oiled beaches, any logging near to these beaches should not occur or be given a wide berth buffer zone so runoff does not carry beach oil to sea.
- 0663-001 Mining - I wish there was a way to have miners clean up after themselves. Take a look at the Peterville mining area. It's really a mess. Junk, oil - you name it.
