### **Bull Moose Harvest Quota Established for Unit 5A, except Nunatak Bench**

YAKUTAT, Alaska—The Yakutat District Ranger, under authority delegated by the Federal Subsistence Board, has established the moose harvest quota for Unit 5A, except the Nunatak Bench, at 55 bulls, with no more than 25 of those bulls to be taken from the area west of the Dangerous River. This quota is effective for the 2011 Federal Subsistence moose season, which is October 8-November 15.

Recent surveys by the Alaska Department of Fish and Game and the U.S. Forest Service indicate a low bull:cow ratio, particularly on the western forelands. The harvest quota has been established to improve the bull:cow ratio and increase productivity of the herd, thereby providing long-term subsistence harvest opportunities.

For additional information, contact U.S. Forest Service Yakutat District Wildlife Biologist Susan Oehlers at (907) 784-3359 ext. 22.
