

Cimarron and Comanche National Grasslands Land Management Plan

October 2008

ERRATA SHEET

This errata sheet makes corrections to the Cimarron and Comanche National Grasslands Land Management Plan (Grasslands Plan). These corrections are minor and do not alter the conclusions made in the October 2008 Grasslands Plan.

Erratum #1

Appendix B. Climate Change and the Grasslands, Section 2.2. Projected Climate for Western North America, including the Great Plains Ecoregion and the Grasslands.

Reads:

The climate projections for western North America forecast an increase in temperatures from June to August of 2–5°C (4–10°F) over the next 30 to 60 years. During these same months over the same time period precipitation is projected to decrease by 15% (CCSP 2008b)

Replace with:

Future climate projections for western North America project an increase in temperatures from June to August of 2–5°C (4–10°F) by 2040 to 2069, and precipitation decreases of up to 15% over that time period (CCSP 2008b).

Erratum #2

Appendix B. Climate Change and the Grasslands, Section 3.1. Climate Change Effects on Resources

Reads:

Major changes in ecosystem structure, composition, and function are expected to occur where temperature increases exceed 2.7°F to 4.5°F (IPCC 2007).

Replace with:

Major changes in ecosystem structure, composition, and function, as well as interspecific interactions, are very likely to occur where temperature increases exceed 1.5°C to 2.5°C (IPCC 2007).
