

# Neighborhood Notice:

## Fire Crews Team-Up on Thinning Project In Your Area

Dear Neighbor,

This is to notify you that crews will be conducting forest thinning activities along the north side of John Wesley Powell Boulevard throughout this winter (see map below for project perimeter). Crews will be working in the area intermittently Monday-Friday – especially Wednesdays – as crews are available and as conditions permit.

This work is being conducted cooperatively by the U.S. Forest Service - Coconino National Forest, Flagstaff Fire Department, Summit Fire Department, Highlands Fire Department, and Pinewood Fire Department in order to increase forest health, increase safety to fire teams during suppression activities, and reduce the risks to neighborhoods in the case of unplanned fires.

If you have questions regarding this thinning activity, please contact the Peaks Ranger District at 928-526-0866.
