YOUR COMMENTS ARE IMPORTANT!

RECEIVED MAR 18 2008

PUBLIC COMMENTS FOR THE PROPOSED ROSEMONT COPPER PROJECT ENVIRONMENTAL IMPACT STATEMENT

If you would like to make a comment or be added to our mailing list, please fill out this form and hand it to any of our staff or mail it to the address provided. You are also welcome to write a letter or send e-mail to: comments-southwestern-coronado@fs.fed.us. Thank you!

COMMENT:

I am primarily concerned about the design and implementation of a sustainable monitoring plan which addresses the following issues:

- (a) quantity and quality (chemical mineralogical, biological) of any groundwater resources underlying the proposed project or aquifers accessible to the project
(b) air quality - especially the chemical (mainly heavy metals and organics) in particulate matter from direct or fugitive emissions at the project sites and environs
(c) potential groundwater and landscape contamination - especially related to arsenic, lead, thorium and uranium
(d) impacts of any road building activities to make the project site accessible.

Experience: 2006 – present: Principal, Joel L Fisher LLC. Owner of a small consulting firm which performs environmental modeling and auditing and statistical analysis of air quality and water quality data for selected clients. Registered for business in Arizona.

1980 – 2006: Environmental Advisor to United States Commissioners, and Senior United States Scientist of the International Joint Commission for the United States and Canada (a treaty organization which regulates and advises on the use of air and water resources associated with the boundary region of both countries). Advised on issues of air pollution, effects of chemicals on animals and humans, mathematical and statistical ecology, and the behavior of border aquatic ecosystems, research associated with these issues, acted as a treaty compliance officer on selected projects of both countries. From 1995 through 2006, I also held the title of Senior United States Scientist of the Commission. **I have retired from this position.**

1991-1993 (contemporaneously with previous position): Professor of Chemistry at the Cooper Union for the Advancement of Science and Art. (New York) Taught courses in chemistry and molecular biology at all levels from freshman through graduate student including: accelerated basic chemistry (a one semester accelerated version of elementary college chemistry); physical chemistry; quantum chemistry and chemical physics; inorganic chemistry; biochemistry; cell physiology and microbiology.

Other Work Experience:

1972-1980 Research Physical Sciences Administrator at the United States Environmental Protection Agency – I worked at USEPA since the creation of the agency as a staff research scientist. My accomplishments included participating in the biological surveys of Alaskan rivers along the route of the Alaska pipeline; wrote, edited or coordinated many of the scientific documents associated with the development of the national (US) environmental regulations on power plant pollution from heated waters; worked on problems of groundwater geochemistry and microbiology; one of the five charter Executive Secretaries of the EPA Science Advisory Board.

Pre: 1972 US Department of Interior: research chemical engineer: helped set up the research grant and contract program of the Federal Water Pollution Control Administration when the group split off from the United States Public Health Service; **US Department of Defense: research chemical engineer:** worked on problems of manufacture and environmental disposal of complex chemical munitions.

Other Information:

Language skills French, Czech, Slovak (highly educated levels)

Honorably Discharged Veteran of the Armed Forces of the United States

Married, two children
