

File Code: 2210/2230

Date: April 27, 2007

Dear Lake Mountain Allotment Permittee:

This letter will serve as our Annual Operating Instructions (AOI) for the Lake Mountain Allotment during the 2007 grazing season. The following items were discussed and agreed upon at our annual meeting and will guide our management of the Allotment this year:

Distribution and Grazing (D&G) Strategy

We will follow the enclosed D&G Strategy. The amount of time spent in each unit will depend upon actual grazing utilization and distribution patterns. The dates proposed and the units scheduled are tentative and depend upon the availability of forage, water, and the effects of weather. We will follow the proposed schedule unless there is good reason to change. Please let us know in advance if you anticipate any variance from this strategy.

Proper Allowable Use

Proper allowable use of riparian areas will be limited to 65 percent utilization on key forage species until July 15. Between July 15 and August 15, grazing use will be limited to 45 percent. After August 15, use on key species in riparian areas will be limited to 30 percent, with a residual stubble height of **no less than 4 inches** left on all stream-side areas at the end of the grazing season. As a steward of the land you are responsible to see that the 4 inches are not exceeded. Proper allowable use will not exceed 60 percent, by weight, of current year's growth on key forage species within upland sites. **Once 6 inches has been reached in key areas, you will be required to move into the next scheduled unit regardless of time or other feed.** Therefore, it is important that your livestock be distributed as evenly as possible.

Violation Reporting

If you witness vandalism or ATVs that are in violation you can contact John Simons 435-790-7060 or 435-781-5131. Please take photos and document the violation to aide in the legal process.

Health of livestock

Following are a list of poisonous plant species that you should watch for:

1. Milkvetch
2. Larkspur
3. Groundsel
4. Deathcamas

5. Locoweed

Fees

Your Bill for Collection for the upcoming grazing season has been sent. Please ensure that this bill is paid by the due date. You will not be allowed to place livestock onto National Forest lands until verification of payment is received in our office.

Range Improvement Maintenance and Construction

All Allotment boundary fences and the division fences, water developments, and other improvements of the first unit used will be repaired before the cattle are allowed onto the Allotment. All water developments, unit fences, and other improvements will be in good working order before livestock are permitted to enter the next scheduled unit in the rotation. We will be inspecting these fences and developments before the livestock go on and also before they move into each unit. If these repairs are not done, you will not be allowed onto the Allotment, or you may be required to come off the Allotment early.

Weed Free Hay

Any hay or straw used in association with your grazing permit will be certified and tagged as noxious weed seed free as directed by Forest Service Order #04-00-097. Please ensure that any hay, straw, or mulch used on the Forest complies with this order.

Records

The **Actual Use** and **Permittee Expense forms** are for your use in recording the actual livestock use, losses, and operating expenses during the upcoming grazing season. Please ensure that the information recorded on these forms is correct and is returned to our office **no later than October 8th.**

We look forward to working with you again this year, and appreciate your willingness to cooperate with us in the proper management of the Ashley National Forest. We hope that the upcoming grazing season proves to be a very productive one for you. If you have questions, please contact **Earl Kerns** at (435) **781-5175** or (435) **790-7035**, or **Heather Garrison** at (435)**781-5168** or (435)**790-7030**.

Sincerely,

NICHOLAS T SCHMELTER
District Ranger
