

TABLE OF CONTENTS

SUBJECT	PAGE
Abstract	<i>i</i>
Summary	<i>ii</i>
Table of Contents	<i>iii</i>
List of Appendices	<i>iv</i>
List of Charts and Tables	<i>iv</i>
Vicinity Map	<i>vii</i>
Range Allotments in the Analysis Area Map	<i>viii</i>
Acronyms	<i>ix</i>
<i>CHAPTER 1: PURPOSE AND NEED FOR ACTION</i>	
A. Document Structure	1-1
B. How This Chapter Is Organized	1-1
C. Chapter Definitions	1-2
D. Introduction	1-2
E. Background	1-4
F. Relationship to Law and Regulations	1-5
G. Relationship to Forest Plan	1-8
H. Purpose and Need	1-9
I. Existing Condition	1-9
J. Desired Condition	1-10
K. Proposed Action	1-15
L. Scope of the Proposal	1-17
M. Decision Framework	1-18
N. Public Involvement	1-18
O. Issues	1-19
<i>CHAPTER 2: ISSUES AND ALTERNATIVES</i>	
A. Introduction	2-1
B. How This Chapter Is Organized	2-1
C. Chapter Definitions	2-2
D. Criteria for Alternative Development	2-2
E. Description of Alternatives Considered in Detail	2-2
• Alternative A – Preferred Alternative	2-2
• Alternative B - No Grazing	2-10
• Alternative C – Sustainable Multiple Use Grazing (SMU-G)	2-10
F. Alternatives Considered But Not Given Detailed Study	2-19
G. Comparison of Alternatives	2-20
<i>CHAPTER 3: AFFECTED ENVIRONMENT</i>	
A. Introduction	3-1
B. How This Chapter Is Organized	3-1
C. Chapter Definitions	
D. Description of Environment	3-1
• Topography/Geography	3-2
• Climate/Precipitation	3-2
• Major Vegetation Types	3-4
• Landscape Scale Assessments of Major Vegetation Types	3-5
• Ecosystem Assessment	3-8
• Condition and Trend of Major Vegetation Types	3-8
• Reference Areas and Research Natural Areas	3-18
E. Description of Affected Environment - Riparian Function	3-19
F. Description of Affected Environment - Water Quality and Quantity	3-29

G. Description of Affected Environment - TECS and MIS Species	3-31
H. Description of Affected Environment - Socio-Economics	3-38

<i>CHAPTER 4: ENVIRONMENTAL CONSEQUENCES</i>	
A. Introduction	4-1
B. How This Chapter Is Organized	4-2
C. Chapter Definitions	4-2
D. Specifically Required Disclosures	4-2
E. Alternatives and Consequences by Issue	4-4
• Riparian Function	4-4
• Water Quality and Quantity	4-9
• TEPCS and MIS Species	4-14
• Socio-Economic Impacts	4-51
<i>CHAPTER 5: Consultation and Coordination</i>	
A. Preparers and Contributors	5-1
B. Public Coordination	5-1
C. Fishlake National Forest Interdisciplinary Team	5-2
D. Core Interdisciplinary Team Members Bio-Sketches	5-3
<i>CHAPTER 6: Response to Comments</i>	
A. Introduction	6-1
B. Summary of Public Involvement Between DEIS and FEIS	6-2
C. Summary of Public Comments on DEIS	6-2
D. List of Respondents to DEIS	6-3
E. Comment Letters and Forest Service Responses	6-3
F. SMU-G Comparison Comments by Mary O'Brien and FS Response	6-13

LIST OF APPENDICES

<i>APPENDIX</i>	
Appendix A: Glossary	25 pgs
Appendix B: Literature Reviewed	7 pgs
Appendix C: Biological Assessment	14 pgs
Appendix D: Plant Biological Evaluation	15 pgs
Appendix E: Vertebrate Biological Evaluation	37 pgs
Appendix F: Fishlake NF TECPS and MIS Life Histories-Incorporated by Reference-Available on Request	162 pgs
Appendix G: Monitoring Plan	3 pgs
Appendix H: Resource Maps (Vicinity Map, Project Allotment Map, Level II Riparian Surveys, Public Water Sources, Bonneville Cutthroat Trout Streams, Noxious Weeds, Predicted Beaver Habitat)	8 pgs
Appendix I: Dr. Charles Kay's Repeat Photography	34 pgs
Appendix J: Long-Trend Studies (Big Game Range, Range Site Analyses)	6 pgs
Appendix K: Soils Data (Soil Productivity Class by Percent Vegetation Type, Soil Class and Vegetation Type By Allotment, Vegetation Type by Percent Soil Class)	14 pgs
Appendix L: Monitoring Streambanks and Riparian Vegetation—Multiple Indicators	29 pgs
Appendix M: Range Science – What Are Your Roots	15 pgs
Appendix N: Big Game Range Trend	38 pgs
Appendix O: Alternative C Stocking Capacity	5 pgs
Appendix P: REA Compilation Data	10 pgs
Appendix Q: Wildlife and MIS Specialist Report	38 pgs

LIST OF CHARTS AND TABLES

TABLE	TITLE	PAGE
Table 1-1	IDT Interpreted Desired Condition Statement	1-11
Table 1-2	Existing and Desired Condition of Key Ecosystem Elements	1-12
Table 2-1	Allotment Inventories	2-3
Table 2-2	Range Suitability	2-5
Table 2-3	Alternative A Maximum Allowable Forage Use Criteria	2-6
Table 2-4	Existing Structural Range Improvements	2-8
Table 2-5	Date of Allotment Management Plan	2-8
Table 2-6	Alternative C Stocking Capacity at 25% of D&I	2-12
Table 2-7	Alternative C Unsuitable Rangeland	2-12
Table 2-8	Alternative C Total Forage Production	2-13
Table 2-9	Alternative C Forage Production by Allotment	2-14
Table 2-10	Alternative C Stocking Capacity With Unsuitable Range Excluded	2-14
Table 2-11	Alternative C Stocking Capacity Based on Adjusted Deer Habitat Exclusion	2-15
Table 2-12	Alternative C Allowable Forage Utilization	2-16
Table 2-13	Comparison of Alternatives— Key Differences	2-21
Table 2-14	Comparison of Alternatives— Ability to Meet Purpose & Need	2-22
Table 2-15	Comparison of Alternatives—Riparian Function	2-22
Table 2-16	Comparison of Alternatives—TEPCS Species	2-22
Table 2-17	Comparison of Alternatives—Socio-Economic Conditions	2-23
Table 3-1	Average Annual Precipitation 1994-2004	3-3
Table 3-2	Average Monthly Precipitation in Inches	3-4
Table 3-3	Annual Streamflow Data for the Beaver River Gauging Station	3-4
Table 3-4	Forest Plan Revision Modeling of Major Vegetation Communities	3-5
