RICHFIELD INTERAGENCY FIRE CENTER 2005 ANNUAL REPORT

Introduction

The Richfield Interagency Fire Center (RIFC) is located in central Utah. The response area of RIFC and the Central Utah Fire Organization consists of over twelve million acres including U.S. Forest Service, Bureau of Land Management, National Park Service, BIA Tribal, State Division of Wildlife, and State Division of Forestry, Fire and State lands. Eight counties are included within the jurisdiction boundaries: Juab, Millard, Sevier, Sanpete, Piute, Wayne, Garfield and Beaver. Interstate highways I-15 and I-70 transect through the area as well as major highways. The terrain includes the Great Basin Desert, the Colorado Plateau, fertile valleys, and high mountain ecosystems. Elevations range from approximately 4,000 to over 12,000 feet.

Highlights

The 2004/2005 winter consisted of record snowfall in the southern mountains, and above average rain in a majority of the lower elevations. This promoted extensive growth of cheatgrass and also allowed for flooding in the spring.

Fire season started on January 16 with the *January* fire with the actual season beginning in May. The last wildland fire of the season was on November 18TH. Pile burning and prescribed fire activities continue as burning conditions allow, both in the spring and fall. Prescribed burning started in February and continued on to November 2nd with the Church Hills RX, and will continue as conditions permit.

The number of fires that occurred in 2005 was above average and the number of acres burned was below average with 281 fires for 22,860 acres. The average is 258 fires for 55,184 acres. There were eighteen fires larger than 100 acres of which five were human-caused, and three were managed for wildland fire use. There was one type-3 fire for 14,604 acres.

Aviation

The Central Utah Fire organization supported one Type-3 helicopter (N5745Y), a Bell 206 L1-C30P, under an exclusive use contract. Helicopter 45Y's duty station was the Richfield helibase located at the Richfield Airport/RIFC. Also, under an exclusive-use contract, one air-attack/reconnaissance fixed wing aircraft (N1ZJ), a Cessna 337T. This was also stationed at the Richfield Airport. Both exclusive-use contracts are administered by the BLM. In addition to the exclusive-use contracted aircraft, the BLM acquired two Single Engine Airtankers (SEAT) on Call-When-Needed (CWN) contracts. The SEAT aircrafts are M-18B Dromaders. Funding was possible through severity dollars. One SEAT was positioned at Fillmore, the other was positioned at Nephi. This allowed for relatively quick response times from a central location within the district. The SEATs supported our fires as well as fires on Cedar City and Salt Lake Districts.

The helicopter flew approximately 72 missions including fire and non-fire for 338.5 hours. The helicopter also transported a total of 1,261 passengers, transported 112,819 pounds of cargo, dropped 126,564 gallons of water.

The air-attack airplane flew a total of 151.69 hours in support of fire and reconnaissance missions and transported a total of 100 passengers.

The SEATs flew 165.62 hours and dropped 115,089 gallons of retardant/foam and water.

SEASONAL WEATHER AND SEVERITY

The winter of 2004/2005 produced above average snowfall in the mountains and rainfall in the valleys. By the middle of June, riparian areas in valleys were experiencing flooding from the snow, but the grasses away from the riparian area were drying rapidly. By the middle of July grasses were very dry and large fire activity was occurring.

RAWS STATIONS AND PRECIPITATION BY MONTH

Overview of Large Fires

Large fire activity started in June with four fires, two of which were human-caused. A type-three fire occurred in mid-July. The West Gilson fire was 14,604 acres and was predominately in grass and brush and grew quickly with the need for extensive suppression efforts. A local type-3 team was activated with numerous non-local resources. Higher elevation conditions provided for using wildland fires to accomplish resource benefits. The Marysvale Peak WFU started small and then grew quickly with activity that warranted suppression efforts with a total of 761 acres. There were other smaller WFUs other than the ones on the list above showing the support for the WFU program. Of the eighteen large fires, five were human-caused.

SCS = South Central State - Utah Division of Forestry, Fire, and State Lands

Sanpete = Sanpete Ranger District, Manti-LaSal National Forest

Prescribed Fire Accomplishments

Due to unfavorable burning conditions during part of the year, not as many burns were accomplished as desired. The program continues to write burn plans and plan for future burns when conditions are favorable. Pile burning continues in the winter.

2005 Prescribed Fire Stats

RID = BLM, Richfield/Fillmore Field Officer
FIF = Fishlake National Forest
FSR = Fish Springs Wildlife Reserve

Cost Effectiveness and Cooperation

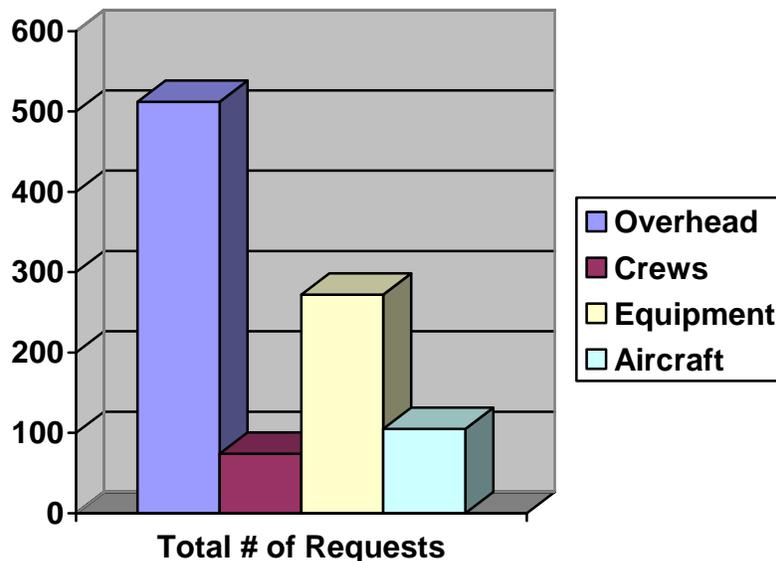

The Central Utah Fire Organization continues to promote cooperation between all agencies and cooperators. The initial attack function continues to improve with most fires kept small. The increased coordination has promoted an effective response to initial reports of wildland fires. The concept of using closest forces includes all agencies for a quick response time. The total human-caused fires were kept to 22% of the total number of fires and only 9% of the total acres. This can be attributed to the fire prevention program and an increased awareness in local communities. Our Prevention Education program has been in full force since 2001 and along with the County Wardens efforts, has resulted in a decrease in our number of human-caused starts.

Resource Ordering and Status System a.k.a. ROSS

Once again we sent out overhead as part of incident management teams and also various single resource assignments. Many of our overhead resources were able to assist FEMA in the Hurricane Katrina and Rita response and recovery efforts. It became apparent once again that fire was not the only mission we would be asked to support. Due to our more average season we were able to send resources to support Color Country in their very busy fire season. A graphical representation of the number of resource orders processed by catalog type is shown below. A more detailed explanation of each category follows.

**Note: These totals are based only on orders placed via the ROSS program they do not include initial attack resource assignments*

Aircraft	105
Crew	74
Equipment	272
Overhead	512
Supply	21
Total	984

Overhead

We have great support from personnel within the Richfield Interagency Area. Local personnel participated in 468 on and off district assignments for a total of 3,588 work days in the field. This is an example of how the fire program is supported and how people respond when

there is a need. In Appendix A is a listing of all overhead personnel and the assignments they participated in for the 2005 season.

Equipment

There were 130 equipment orders filled for on and off district use. Those 71 pieces of equipment worked for a total of 619 days on these assignments. See Appendix A for a listing of participating equipment and the missions they preformed.

Crews

Crew assignments ranged from fire suppression crews to camp crews. RIFC handled a total of 25 crew orders with 145 work days accomplished on projects. Again see Appendix A for more details on who went where and when.

Aircraft

RIFC processed 105 aircraft requests. These included requests for airtankers, helicopters, SEATs, Air Attack aircraft, and others. For a description of the local aircraft use see the Aircraft section in this report.

PERSONNEL EMPLOYED ON WILDFIRE PRESUPPRESSION AND SUPPRESSION ACTIVITIES	UNIT
	0408
	CALENDAR YEAR
2005	

INSTRUCTIONS: 1. Data for items 1a, 1b, and 2b should be taken from planning and budget records in the Supervisor's Office.

2. Items 1c, 1d, 2b, and 2c may be obtained from actual records in the S.O. or from the Ranger District. If obtained from the Ranger having intimate knowledge on use of his personnel, these items may be estimated. Complete accuracy is not required.

3. Item 3 may be estimated where large numbers of casuals are employed. Since each reemployment counts as a new employment, sufficient accuracy can be obtained by sample counts and measurement of time slips.

ITEM NO.	ITEM	NUMBER	
		SUB-TOTAL	TOTAL
1.	Regular appointed personnel		
a.	Full-time fire management (<i>20 pay periods or more</i>)	13	
b.	Part-time fire management	23	
c.	Others used on presuppression sometime during year	8	
d.	Others used on suppression (<i>exclude those reported under a, b, or c</i>)	34	
e.	Total (<i>a + b + c + d</i>)		78
2.	Seasonal or short-term personnel		
a.	Regular fire control (<i>crews, firefighters, patrol, lookouts, etc.</i>)	46	
b.	Others (<i>BD, KV, BR, R&T, etc.</i>) who spent time on fire control work	12	
c.	Emergency firefighters (<i>exclude those reported under a or b</i>)		
d.	Total (<i>a + b + c</i>)		58
3.	Total number of casuals employed on fire suppression (<i>Each reemployment counts as an employment</i>)		12
4.	Number of casuals (<i>included in Item 3</i>) employed for first time (<i>Ranger's estimate is adequate</i>)	10	
5.	GRAND TOTAL (<i>1e + 2d + 3</i>)		148
