

Changes to Chapter 2 between Draft and Final EIS

The MPC descriptions were updated in the Elements Common To All Alternatives section. This section was made a subsection and moved so that it now appears under the Alternatives Considered In Detail section.

The Alternative descriptions in the Alternatives Considered In Detail section were revised to respond to public and internal comments on the DEIS. Specifically, the generic goal statements in the DEIS were replaced by a more detailed and comprehensive discussion of the MPC allocations relative to resource areas and issues. Alternatives 3, 4, 5, 6, and 7 now have sections describing the issues that influenced their development.

Alternative 7 was added to respond to specific comments and concerns on the DEIS.

The Comparison Of Alternatives section was updated to reflect changes to the effects analysis in Chapter 3 and revised model outputs.
