Construction to Start on Boundary Creek Barracks

The Forest Service has awarded a contract for the construction of a barracks building for the Boundary Creek Boat Launch to Mack Mechanical. The first phase of construction will begin the week of August 11 and will continue for two weeks, according to Middle Fork District Ranger Chris Grove. Drivers should be aware of the heavy truck traffic on Forest Roads 579 and 568 (Fir Creek and Boundary Creek) that lead to the Boundary Creek Boat Launch, particularly near the beginning and end of this phase of construction. Heavy equipment will be moved into and out of the job site. The contractor will be constructing the access road, parking area, and the utilities for the new building. This phase of construction should have little-to-no affect on the boat launch or campground facilities.

A second phase of construction will occur near the middle of September, when the modular barracks facility will be set in place. Additional announcements will be made at that time.
