

## Deer Park 2007

**6/26/2007**, Dennis received a call from Ralph McRea today regarding some backhoe work James Whittaker had done on the Deer Park unit. Some one working for James had dug a pond below the head box for spring #4224. Ralph claim to have a water right that was being effected by cutting off water to his private lands. Dennis and I looked at it (photos) and agreed to call James and have him fix it (put it back how it was). James returned my call later that evening and so was informed. *J. Robson*

**7/6/2007**, I went up in Deer Park unit with the 4-wheeler to check that the work had been done to restore the spring (#4224). Work had been completed and the allotment fence had been put back. I looked for other newly constructed ponds and found none. The cattle were all near Deer Park creek and salt had been places next to Deer Park creek. I moved the salt. At the very head of the west fork of the creek I found an pond that Ralph told me about. It had very good flow and was not being used. *J. Robson*
