

Proposed Snow Trail in Relationship to Crucial Elk and Moose Habitat Alternatives 1, 1A, 1C & 7

Wasatch-Cache National Forest
Logan Ranger District

*These dataset were developed by the Utah Division of Wildlife Resources. They represents Rocky Mountain Elk and Moose use areas in Utah as determined by wildlife biologists during 2001. In May 2006 the datasets were converted from a Critical, High, Substantial and Limited value system to a Crucial/Substantial value system. This data were developed for use at the 1:100,000 scale.
