

**Errata Sheet for the  
Lower Sage Wildlife Project Decision Memo**

Page 2, Fourth bullet reads:

- Less than 1,000 feet of fireline would need to be constructed in several perimeter locations where there is no good existing burning boundary. Fireline would be constructed by hand or machine, depending on terrain and vegetation conditions.

This should read:

- Less than 2.5 miles of fireline would need to be constructed in several perimeter locations where there is no good existing burning boundary. Fireline would be constructed by hand or machine, depending on terrain and vegetation conditions.
