

## APPENDIX G

### NFS ML 2 Roads Not Meeting Land and Resource Management Plan Standards and Guidelines

In modifying Alternative B following the release of the DEIS, each of the NFS ML-2 roads across the ENF was reviewed to determine if public wheeled motor vehicle use of the road is consistent with ENF LRMP Standards and Guidelines. In the development of Alternative B, some routes were proposed to be closed to public wheeled motor vehicle use based on the theme of the alternative. In addition, many ML-2 roads were proposed to be limited to highway legal vehicles only because the roads are short, and begin at a paved road or road that is otherwise closed to OHV use, and therefore did not provide an extended OHV travel opportunity. Public comments following the release of the DEIS pointed out that many of these roads are used for training or teaching, hunting, and various other forms of exploration. Forestwide ENF LRMP Standard and Guideline 27 states that “ML-2 roads will generally be designated as open to Greensticker OHV use unless adverse environmental impacts or conflicts with other uses are identified.” OHVs are required to comply with the California Vehicle Code and so the proposed limitations in Alternative B on the use of OHVs on short roads that were otherwise open to public motor vehicle use were considered to be unnecessarily restrictive. It is understood that individuals will need to transport their OHVs to these roads and will have only limited travel opportunities, but it is recognized that there are legitimate uses of these roads.

Public comments also identified the need to display the specific LRMP Standard and Guideline or other resource conflict for each ML-2 road not proposed to be open for public wheeled motor vehicle use. The following table displays the ENF LRMP Standards and Guidelines that those ML-2 roads proposed to be closed to public wheeled motor vehicle use are inconsistent with. The key below identifies the individual standards and guidelines or other conditions which are referenced in the table:

Label in Table	Standard and Guideline or Other Direction
ROW	Roads and trails for which required rights-of-way do not exist and those located predominantly on private land will not be designated for OHV uses, however, a list will be developed of priority ROW acquisitions needed to complete the desired road and trail system (Forestwide MP 27, LRMP page 4-84)
Meadow	Close roads to and across meadows (MA 28 MP 104, LRMP page 4-282).
Sensitive Plants	Provide for protection and habitat needs of sensitive plants so forest activities will not jeopardize the continued existence of such species (Forestwide MP 49, LRMP page 4-91).
RCO	Evaluate new proposed management activities within CARs and RCAs during environmental analysis to determine consistency with the riparian conservation objectives at the project level and the AMS goals for the landscape. Ensure that appropriate mitigation measures are enacted to: (1) minimize the risk of activity-related sediment entering aquatic systems and (2) minimize impacts to habitat for aquatic- or riparian-dependent plant and animal species (Sierra Nevada Framework Plan Amendment S&G 92 for Riparian Conservation Areas (RCAs) and Critical Aquatic Refuges (CARs), ROD p. 62)
Research Natural Area	Close Research Natural Areas year-long to off road vehicles (MA 3, MP 28, LRMP page 4-138)
W&SR	Close Wild River corridors to all motorized travel (MA 2 MP 28, LRMP page 4-132 as applied to recommended Wild River segments).
Pvt Res S&G	OHV use will generally be excluded within ½ mile of privately owned property

	with existing residences. It is recognized that this will not be feasible in all cases because of intermingled private lands and physical characteristics of the land (Forestwide MP 27, LRMP page 4-84).
Administrative Site	Road which is not open to public wheeled motor vehicle use because it accesses an administrative site, such as government housing, a storage building, etc.
Closed/Barrier	Roads that have been physically closed to public wheeled motor vehicle use or for which a decision has been made to close the road to public motor vehicle use
No Access	Road which is not accessible because connecting roads are not open to public wheeled motor vehicle use.
No Public Land	Road which is located on private land and does not provide motor vehicle access to public land.
