Almanor Trail Extension Completed

Susanville, CA...The Lassen National Forest has recently completed work on the much anticipated extension of the Lake Almanor Recreation Trail (LART). The extension adds an additional mile and a half that connects the LART from Rocky Point Campground to Canyon Dam Boat Launch Day Use Area.

“This extension offers spectacular views of the lake and provides a great experience for families and individuals who wish to enjoy the outdoors,”

commented Almanor Ranger District

Resource Officer Jane Goodwin. “The Almanor trail is now 11.25 miles and people can either begin or end their journey at West Almanor or Canyon Dam.”

The new Almanor Trail extension meanders along the west shore of Lake Almanor near Canyon Dam.

Funding for the work was provided through a grant from the Federal Highways Administration under the Transportation Equity Act for the 21st Century (TEA-21) Program and the Lassen National Forest. Big J Construction from Medford, Oregon began work in mid-August and completed the project October 22. While motorized vehicles are not allowed on the trail visitors are encouraged to either walk or bike and enjoy all that this trail has to offer.

For more information call the Almanor Ranger District at (530) 258-2141.
