

HIBERNATE

Yellow-bellied Marmot

Some rodents will curl into a tight ball and let their body temperature drop to nearly freezing.

Garter Snake

Reptiles and amphibians can settle down into the mud until the ground begins to thaw.

Chipmunk

American Bullfrog

California Ground Squirrel

These animals find a snug place to sleep through the winter.

Bears are not TRUE HIBERNATORS

Many bears will stay in a den for a couple weeks at a time.
