Western Washington Columbia River
Tributaries Watershed Analysis

Dear Interested Parties,

Please find enclosed a draft of the Western Washington Columbia River Tributaries Watershed Analysis.

This document was started several years ago and a draft has now been completed. The delay was a result of changing priorities, due largely to unanticipated new projects. However, we are pleased to have this document ready for your review.

Hard copies are being sent to agencies and those individuals who responded to earlier requests; a copy of the document can also be found on the web page of the USDA Forest Service, Columbia River Gorge National Scenic Area.

Watershed Analysis documents are not decision documents. All activities mentioned or referenced must first meet all National Environmental Policy Act (NEPA) requirements prior to being implemented. The value of the Watershed Analysis is to examine and bring together all pertinent data on a broad landscape scale so that future projects will be more meaningful to the larger land base.

Please review this document and return any comments or concerns you may have to Robin Dobson, CRGNSA, 902 Wasco Ave., Hood River, OR 97031, or email him at rdobson@fs.fed.us. You may contact Robin with any questions at 541-308-1717. Please respond by September 23, 2002.

Sincerely,

KIM A. TITUS
Acting Area Manager
