9. Statement of Project Goals and Objectives: (max. 7 lines) Reduce the hazardous fuels on lands bordering high-use recreation areas and adjacent to private residences bordering national forest lands in the South Jetty area. Reducing fuel loading in these areas will provide for a much safer area for recreationists and area residents, and should a fire occur in this area, control would be much safer and easier, and more timely, for all involved. 9a. Project Cost: \$11,770

10. Project Description: (max. 30 lines.) Fuels will be treated by mechanical means, burning, and hand slashing, or a combination of one or more of these methods. Treatment has already begun in some of these areas and follow-up work is needed. This is one of the highest visited areas by recreationist on the Dunes and will be done adjacent to the following recreation developments (South Jetty Hill, Goose Pasture, and along the beach). We plan to create buffers and fuel breaks to allow for safer and timely fire management.
