

Log into ROSS here: <http://ross.nwcg.gov>

At the top center of your screen you will see:

Resource Ordering and Status System

an NWCG-sponsored project

Now click on the word **STATUS** and it will take you to the Web Status page, then login with the login and password I gave you.

When you get logged in you will be at the following screen. First look to the bottom of the screen and click on change password. Type in the one I gave you then type in your new one. It must be 8 characters long with at least one number.... Don't forget your new password please.

The rest is pretty simple, Set your availability, Check the box if you are available and if not select a reason and add remarks if you have any.
