
National Forests in Mississippi Monitoring and Evaluation Report

Fiscal Years 2000-2003

CERTIFICATION

I have evaluated the monitoring results and recommendations in this report. I have directed that the Action Plan developed to respond to these recommendations be implemented according to the timeframes indicated, unless new information or changed resource conditions warrant otherwise. I have considered funding requirements in the budget necessary to implement these actions.

When all recommended changes to the Forest Plan have been implemented, the Plan will be sufficient to guide land and resource management of the National Forests in Mississippi in the future, unless ongoing monitoring and evaluation identify further need for change.

Any amendments or revisions to the Forest Plan will be made using the appropriate NEPA procedures.
