

APPENDIX B

NATIONAL FORESTS IN MISSISSIPPI
LAND AND RESOURCE MANAGEMENT PLAN

AMENDMENT 3

The Management Guidelines for Streamside Areas, Appendix M, are amended to permit the use of low intensity fire in the perennial and intermittent streamside filter zones; to clarify that lakes are included in perennial streamside standards; and to allow oil and gas mineral development within the filter strip when it would be impractical to locate it elsewhere, provided that the mineral activity is properly mitigated to protect soil, water, riparian habitats and other resource values.
