

## Chapter IV. FY 2002-2003 Action Plan

### A. Actions Not Requiring Forest Plan Amendment or Revision

Activity	Recommendation	Person(s) Responsible	Proposed Accomplishment Date
1. Erosion Control	Continue to assess the effectiveness of the additional post-sale erosion control requirements to prevent sediment from entering streams.	Timber Sale Administrators	Ongoing
2. Monitor MIS	Continue to develop population trends for MIS.	Forest Biologists	Ongoing
3. M&E Report	Assign a Core Group to evaluate effectiveness of current reporting methods and report to Forest Leadership Team findings.	Forest Supervisor	End of FY 2004
4. NRIS Databases	Continue implementation of all appropriate NRIS modules.	NRIS Module Coordinators	Ongoing

### B. Actions That May Require Amendment or Revision to the Plan

Activity	Recommendation	Person(s) Responsible	Proposed Accomplishment Date
1. Plan Amendment	<p>Evaluate the <i>Plan's</i> Chapter V to determine the critical monitoring elements that can accurately identify effects of management activities on the land. Add any monitoring items not currently found in Chapter V and eliminate those items found not to truly assess effects of management activities.</p> <p>Items to review include:</p> <ol style="list-style-type: none"> <li>1. MIS selections.</li> <li>2. Monitoring questions.</li> </ol>	Forest Leadership Team	<ol style="list-style-type: none"> <li>1. End of FY 2005</li> <li>2. Next planning cycle.</li> </ol>

Activity	Recommendation	Person(s) Responsible	Proposed Accomplishment Date
2. Plan Amendment	Based on a recent Biological and Physical Review (BPR), the Grasslands needs additional work for strategic direction through a separate or substantial amendment to the Plan. Also, there is a need to evaluate whether to modify/change the <i>Plan's</i> Range MA-3-59 Standard and Guideline.	Resources Team Leader	Next planning cycle.
3. Plan Amendment	Incorporate appropriate habitat standards from the Revised RCW Recovery Plan.	Resources Team Leader	End of FY 2004
