

**ERRATA**  
**DEERFIELD WIND PROJECT**  
**DRAFT ENVIRONMENTAL IMPACT STATEMENT**  
**EXECUTIVE SUMMARY**

The following is a list of corrections to the Executive Summary of the Deerfield Wind Project DEIS. The text written below should replace incorrect text in the document, or be additional text as noted.

**Ecological Resources (see DEIS Section 3.9) (page 28)**

As reported in the BE, potential habitat may be found within the Project area for six animal Regional Forester Sensitive Species (RFSS): rusty blackbird (*Euphagus carolinus*), creek heelsplitter (*Lasmigona compressa*), harpoon clubtail (*Gomphus descriptus*), southern pygmy clubtail (*Lanthus vernalis*), West Virginia white (*Pieris virginiensis*), and gray petaltail (*Tachopteryx thoreyi*). Potential habitat for rusty blackbird occurs in delineated Wetland Q. Potential habitat for harpoon clubtail and southern pygmy clubtail occurs in delineated stream ID#s 7 and 14.
