

Proper Food Storage

- **Keep cooking/eating area separate from sleeping area —**

Cooking/eating and sleeping areas should be separated if you are camping with only a sleeping bag or tent.

- **Change clothing soiled with spilled food —**

Food odors that linger on clothing can attract bears. Wash clothes soiled with food or cooking grease, or store in the trunk of your car.

- **Properly store food —**

Store all food, coolers and utensils in the trunk of your car, or hang food 10 feet up and 5 feet out on a tree limb that will not support a bear.
