

Alcona County

Alcona County Board of Commissioners has constructed a radio tower at the Glennie Guard Station and maintained a Communications Use Lease for the past 10 years. The current lease expires 12/31/2008.

Application has been made by the Alcona County Board of Commissioners to maintain this antenna and continue this use of the site for radio equipment.

The tower was constructed by Alcona County to replace an older tower and includes antennas and communication equipment for the Alcona County Road Commission, Emergency Management Services, and Forest Service communication.
